#### IMAGE 1.1a Nineshotz Cubes & Shotglasses (not to scale)

1.0 Corporate Plan

1.1 Executive Summary

#### Introduction

Within the \$150 billion U.S. alcoholic spirits industry, a potentially huge untapped market exists for premium prepackaged shots. The Nineshotz Corporation (Nineshotz Corp.) was established to develop, bottle, market and distribute said alcoholic beverages at a fair price to a general market of adults between the ages of 21 and 45 with no specific socioeconomic, racial or geographic considerations. Nineshotz Corp., acting as a responsible member of the alcoholic beverage community will adhere to all guidelines set forth by the *Distilled Spirits Council of the United States (DISCUS) Code of Good Practice* for the distribution, advertising and sale of distilled spirits (a complete copy of the *DISCUS Code of Good Practice* can be found in Section 1.4.3.2 of this document).

We have endeavored to create a unique brand identity and packaging design that will become synonymous with premium prepackaged shots. Whether sold individually as "SingleShots" or in our convenient 9-pack cube, Nineshotz is immediately recognizable – from our aesthetically pleasing shotglass silhouette to the graphically exciting cube, we are a brand that gets noticed. Our first-in-the-industry pull-tab closure is a selling proposition exclusive to Nineshotz.

#### The Product

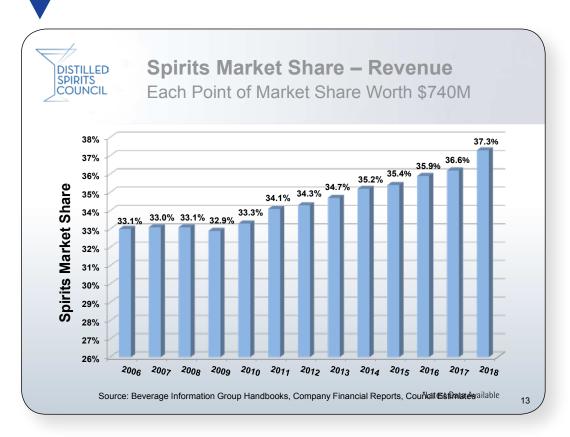

After significant research and development, Nineshotz Corp. has released a line of prepackaged, premium alcoholic shots (see Image 1.1a) that will serve as the foundation for brand introduction into the U.S. marketplace. Nine original flavors of our product, bottled and marketed under the brand name "Nineshotz", will constitute the product line at launch with additional flavors coming on-line several times per year and for special events & holidays. Additionally, our bottling operation allows us to pack ANY beverage into our bottles, a great opportunity for brand cross-promotion. This flexibility in our product line allows us to shift flavors quickly as well as providing the ability to produce many different styles of beverages – including cream based products. The attractive 9-pack cube features a crystal-clear PET® box containing nine 50 mL prepared alcoholic shots in proprietary PET plastic shotglasses.

ALL Nineshotz products will conform to the branding guidelines as described in Section 5.0, The Brand. Deviation from these guidelines will not be permitted and a comprehensive review function has been designed into the approval process for all marketing communication (see Section 5.1.6 for more information on Corporate Brand Review). The Nineshotz logos will be imprinted on ALL Nineshotz products to further reinforce brand awareness (see Image 1.1b).

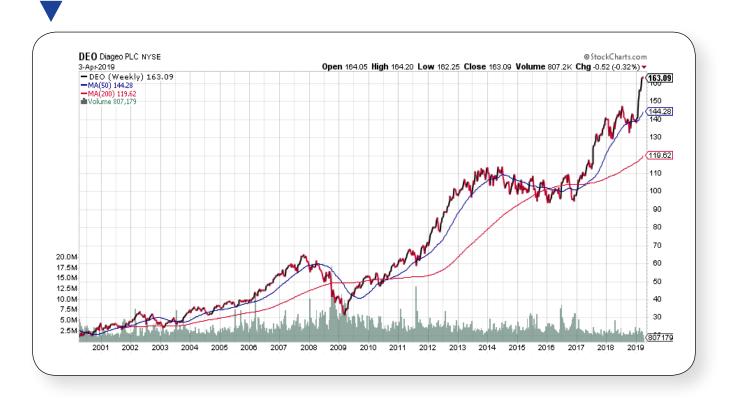

Nineshotz Corp. will distribute our product exclusively through alcoholic beverage retailers and will not sell directly to consumers. Nineshotz Corp. has contacted distributors in 33 U.S. states and several countries across 4 continents. Distribution will start in TX and FL with SC, NC, TN and GA following closely behind. Additionally, we plan to distribute product to the international market soon after launch in countries such as Trinidad & Tobago, the Dominican Republic and Canada.

# **MARKET SHARE UP IN 2018** Slide from the Distilled Spirits Council (DISCUS) 2016 Economic Briefing\*

#### FIGURE 1.1c Diageo 22 Year History (NYSE: DEO)

Concurrent with our campaign to market this product, Nineshotz Corp. will provide tasting opportunities through larger retail outlets, thus promoting awareness for word-of-mouth advertising (for further detail on this subject, please see the Marketing Strategy in Section 1.5.4 of this document).

#### The Market

Sales in the alcoholic beverage industry have been historically stable and respond well to market fluctuations. Economic indicators for most segments of the industry show growth during positive economic times and stability or growth during periods of fiscal uncertainty.

This is a mature industry crowded with suppliers, distributors and retailers. This active marketplace allows us to take advantage of complex, pre-existing national and international infrastructures. Within this industry, giants including InBev, Coors, Diageo (Symbol DEO, Figure 1.1c) and Pernod Ricard USA have shown level or increased sales despite volatility in the U.S. and World economies during the past decades. Nineshotz Corp. believes that with this demonstrated increase in revenue for the industry, independent of economic indicators, a product such as Nineshotz will begin a new trend in the sales of single-serve spirits-based products. This trend should enable us to open an untapped sector of the market and acquire significant market share over the three years following introduction.

## Financial Considerations

Launch costs can be found in Section 1.2.2 with complete proforma budget shown in Section 7.0, Financials. These expenditures can be broken into two categories, the first being "inventory" related costs including setting up the manufacturing line, formulating flavor recipes and casting molds for the shotglasses. The second category includes "corporate" expenses including advertising, corporate overhead, accounting and legal fees, etc.

Basic cost estimates including corporate, manufacturing and marketing costs can be found in Section 7.1, Pro Forma Operating Budget. We will take every possible step to minimize corporate overhead and manufacturing expenses, allowing us to reach a break-even point as quickly as possible.

Nineshotz Corp. is seeking a financial package based on an issuance of a portion of Nineshotz common stock. We will work with our capital partner to determine and plan our exact financial needs and expenditures. It is imperative that we secure proper financing from the beginning of operations, affording us the opportunity to establish a healthy fiscal record allowing us to repay our debt to lenders via income from product sales rather than repaying debt with alternative financing. It should be noted that the owners of Nineshotz Corp. would not take profits out of the business (other than payroll, bonuses and expenses) until any long-term debt obligations have been satisfied. Profits remaining after the above debt payments have been satisfied will be used to finance growth allowing for expansion of the brand into new markets. Operational expenses of the business will include items such as research and development of new flavors and the introduction of additional product lines as described in Section 1.3.6 of this document.

6 ninesh

Presently, the major distributors of alcoholic beverages are not producing a comparable product. It is the objective of Nineshotz Corp. to fill a gap in the market that major producers and distributors have overlooked. We intend for the Nineshotz brand to become the dominant product in the premixed alcoholic beverage market.

Nineshotz Corp. has developed a unique line of alcoholic beverages that will serve as the foundation for brand introduction into the U.S. marketplace. This initial product will be introduced under the brand name "Nineshotz" and will be the sole product supported by our pre-launch and general marketing efforts in order to develop immediate brand awareness as well as set the stage for a future line of products.

Public Mission Statement:

"Nineshotz promises to provide the highest quality, best tasting alcoholic beverages and in return we ask our customers to enjoy these beverages responsibly."

The management of Nineshotz Corp. firmly believes that we have the *right product* at the *right time* to attract a loyal customer base with wide-ranging socioeconomic status. More importantly however, it is our business philosophy that will ensure success. The alcoholic beverage industry demands the highest quality product while maintaining a keen perception to the public's ever-changing expectations. Nineshotz Corp. will satisfy these demands by making it a top priority to be aware of the constantly evolving needs, fashions, fads and trends of our demographic positioning profile. It is our current practice and future intention to monitor and study the products and advertising used by competitors and non-competitors alike.

Nineshotz Corp. will also satisfy customer demands by maintaining acceptable inventory levels that will be delivered on-time according to pre-arranged shipping schedules or by adopting inventory-on-demand systems currently being used by other distributors and manufacturers.

Nineshotz Corp. will institute a super-stringent quality control procedure for overseeing all aspects of production from packaging to shipping and distribution (see Section 1.3.7, Quality Control).

In addition to offering a line of pre-packaged shots, Nineshotz Corp. will produce and distribute a unique line of promotional and for sale products (via retail outlets and our website, <u>nineshotz.com</u>) that will reinforce top-of-mind awareness allowing prospective customers to remember and thus consider our product first when purchasing an alcoholic beverage. It is exactly this top-of-mind awareness that is the cornerstone of the Promotion Strategy outlined in Section 1.5.4.3 of this document.

"Beverage makers are offering customers more variety in flavors of drinks and in alcoholic content of drinks to encourage more at-home use."

The Nineshotz Corporation was founded on the 20<sup>th</sup> of August, 2003, after six months of conceptual development and initial product research. The following ten years allowed the owners to research the industry and attend trade functions while still working in their respective careers. The past 5 years have seen the completion of both the research and development phase as well as the preparation of this corporate plan. Please see Section 6.0, Milestones for a detailed history of the corporation to date.

**Ownership Data** Total Shares: 50,000,000 Shares Owned: 33,392,641 Percentage of Shares Owned: 66.79% Major Shareholders (>10%) Pascucci Family (59.81%) Minority Shareholders (<10%) Private Investors (6.98%)

Please see Figure 1.2.2a for a summary of launch related expenses. This initial fund disbursement will be used to proceed with manufacturing and begin corporate operation as described in the tables. Figure 1.2.2b shows projected gross margins of our base product (90 Pack Case).

1.2.3 Company Locations and Facilities

The Nineshotz Corporation main office is located in downtown Tampa, Florida, with supplier facilities in Lake Alfred, FL; Auburndale, FL; Miami, FL; Batavia, NY and Hsin Chu Industrial Park, Taiwan. Our bottling plant and distribution facilities are in Cocoa, Florida.

Bulk beverages are distilled and prepared in Lake Alfred or Batavia then shipped by truck in food-grade plastic shipping containers to the bottling facility in Cocoa where the separate elements of the Nineshotz product come together. This facility prepares, fills and seals the shotglasses and then builds, loads and closes the completed Nineshotz cubes. Customers may choose either ten 9-pack cubes or 90 individual shotglasses in each 4.5 L case.

Nineshotz Corp. researches/develops, bottles and distributes pre-mixed, pre-packaged alcoholic shots. Our target customer is 21-45 years old with no socioeconomic, racial or geographic considerations. We intend to distribute our product solely through alcoholic beverage retailers. Our initial product line is uniquely designed to strengthen brand awareness and to "leave the door open" for future additions to the product line, many of which will be chosen by our customers through a voting system on the Nineshotz website <u>nineshotz.com</u>.

3 nineshotz

The initial product distribution efforts will support our first nine flavors of Nineshotz. This product line will serve as the basis for development of our brand image as described in Section 5.0, The Brand.

The product will be distributed in the aforementioned clear, cube-shaped PET® box imprinted with our logo and product information. The cube has a semi-circular handle on top that folds up to assist in carrying. The shots will be packaged in proprietary clear plastic shotglasses imprinted with the Nineshotz logo in black and white inks.

1.3.2 Competitive Comparison

Nineshotz Corp. has not found any alcoholic beverages with enough similarity to be considered a directly competitive product. See Section 2.0, Competitive Products for a detailed list of currently manufactured beverages that we considered to be indicators of the current state of the alcoholic beverage market.

1.3.3 Sales Literature

Nineshotz Corp. intends to initially advertise our product through the use of (1) out-of-home media and instore displays, (2) promotions at local retailers and entertainment venues, (3) word-of-mouth advertising and (4) internet, social and e-mail efforts. Sales literature will be used by our internal sales staff and for presentation to potential distributors and retail outlets. These materials will be created in-house or by our advertising agency of record.

Nineshotz Corp. will purchase pre-mixed spirits based beverages directly from our distilleries (see Organizational Structure in Section 1.6.1 of this document). It is not our intention to directly compete with any product currently produced by our manufacturing partners. Other parts of the product are sourced from various manufacturers throughout the State of Florida and Taiwan.

Nineshotz Corp. has packaging and other considerations that are unique and patentable, thus we have included a line item in the operating budget for ongoing trademarks, patents and registrations. The Nineshotz product name and the Nineshotz Logo are trademarked by the U.S.P.T.O.

We intend to establish a reputation for delivering a superior product of the highest quality always conforming to our branding guidelines. For these two reasons, in conjunction with our targeted advertising campaigns, we believe that quality assurance should be a priority and will be a major business asset, impossible for a competitor to duplicate. However, this know-how and integrity is a function of the management and employees, not a matter of patents and trademarks.

# "The U.S. distilled spirits industry accounts for over \$150 billion in total economic activity."

9 nines

Nineshotz Corporation's basic business concept is to pave the way and become the leader in this untapped market. We will constantly be on the hunt for cutting-edge product ideas. It is our intention to deliver a complete line of 9 flavors of pre-mixed shots during our first year of operation. After the first year, new shot flavors will appear on the market every 3-6 months depending on the state of the market at the time. Many of the shot flavors will be chosen by our customers online at nineshotz.com. When a flavor becomes especially popular, there is an option to sell that flavor in a larger form factor, such as a 750 mL container (see Image 1.3.6a). This 750 mL line is something our bottling facility already has the capacity to produce and we would not be required to purchase any additional equipment.

Upon addition of this line, we will complete a market analysis to determine the next phase of our expansion as the alcoholic beverage industry is constantly fluctuating. One of our biggest challenges will be maintaining our reputation in the market and continuing to lead that market in brand awareness and trust.

Quality control will be of major concern. We will take steps to ensure that appropriate quality control procedures are created, tested and put in place throughout each phase of the manufacturing process. Random guality samples will be pulled from the line on a regular basis for inspection. A complete guality control plan will be established and implemented once product launch is scheduled.

1.4 Market Analysis Summary

The market for alcoholic beverages is growing at a steady rate. The proliferation of recent products such as flavored spirits and flavored bourbons & whiskeys, as well pre-mixed and R.T.D. (ready-to-drink) alcoholic beverages reflect the target indicators for the market of our beverage.

By our estimation and based on industry and product research, we believe that sales of our product will only be limited by the number of retailers we include in the distribution chain. It is of utmost importance that we seek distribution and/or marketing agreements with alcoholic beverage retailers such as ABC Fine Wine and Spirits, Total Wine, Walgreen's Liquors, Sweetbay Liquor Store, Publix Liquor Store and other similar multi-store chains to gain retail traction as guickly as possible (see Section 1.5.6 of this document for further detail on Strategic Alliances and Section 3.0, Distributors and Retailers for further information about the retailers listed above).

1.4.1 Market Segmentation

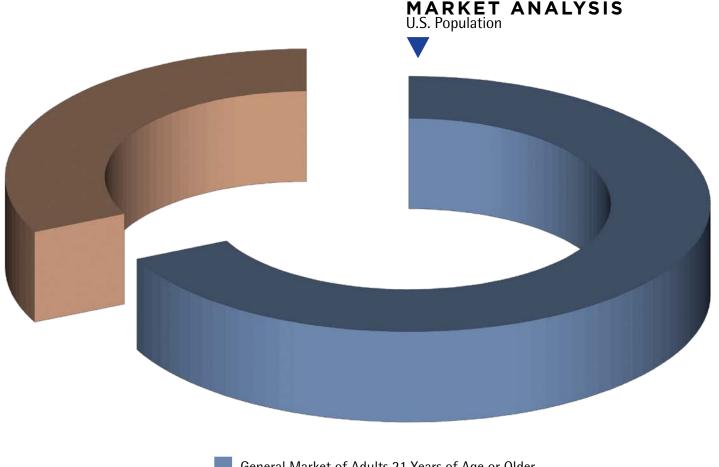

Our potential customer groups are defined by only one market segment – over 21 years of age. We do not segment the market by income, race, geography, buying patterns, behavioral patterns or any other classification. Our advertising campaigns will target adults between the ages of 21 and 45, yet we will not exclude the "over 45" market as our advertising is aspirational in nature and can be described as "timeless and rich, evoking lust for an exclusive, privileged lifestyle". Our advertising will use simple ideas and concepts that should be understood by people of all ages and economic backgrounds.

o ninesh

## POTENTIAL CUSTOMERS

Typical Medium-Sized City

		Year 1	Year 2	Year 3	Year 4	Year 5	
Potential Customers	Growth						CAGF
General Market of Adults 21 Years of Age or Older	1.41%	224,749	227,918	231,132	234,391	237,696	1.41%
Persons Under 21 Years of Age (YOA)	1.41%	106,251	107,749	109,268	110,809	112,371	1.41%
Total	1.41%	331,000	335,667	340,400	345,200	350,067	1.41%

General Market of Adults 21 Years of Age or Older Persons Under 21 Years of Age (YOA)

For advertising purposes alone, we will define the Nineshotz target customer as a stylish, intelligent, young to middle aged adult; someone who is current on popular trends and has an active lifestyle which includes the recreational, responsible consumption of alcoholic beverages. The term "stylish, intelligent, young to middle aged adult" does not refer necessarily to age, but more to the "state-of-mind" that we associate with people with dynamic, healthy lifestyles. Our product will be marketed with an "exclusive and upscale" image; however, the advertising will be broad enough that it will appeal to consumers from all income levels (see 5.0, The Brand).

1.4.2 Target Market Segment Strategy

The target market segment strategy that Nineshotz Corp. will employ is based solely on the national drinking age, however our advertising will be directed towards the premium-luxury market.

As you may expect, we will be entering a mature industry that's packed with suppliers and distributors. As with any product-oriented business, it is important to maintain a competitively priced product line. The safest way to increase overall margins will be to continuously introduce new products which will remain exclusive offerings for a period of time. If and when the competition finds a way to source similar products, the margins will adjust downward, driven by competitive market forces. It will be critical for Nineshotz Corp. to keep one step ahead of the competition by having a new product ready for introduction when the margins slip. Thus, a new cycle of discovery will begin. We intend to be the originators, not the imitators.

Retailer and distributor service and support will also be a top priority as these parties will be in constant contact with both our current and potential customers. Constant contact by the management and sales representatives of Nineshotz Corp. with these retailers and distributors will keep the lines of communication open to facilitate the sharing of information and possible product innovation. It is our intention to introduce a truly unique product which, in combination with a well-laid advertising plan, will be a winning proposition for Nineshotz and our retailers.

As stated previously in the Market Analysis Summary in Section 1.4, the proliferation of new alcoholic beverages such as the current lines of popular flavored spirits and malt-type beverages are the indicators we intend to use as our guideline for market forecasting. These beverages have become popular due to the fact they appear to be new and innovative, even though the roots of these beverages go back as far as the 1970's. The history of the alcoholic beverage industry has shown several similar trends including the evolution of beverages such as wine-coolers and malt-beverages like Zima and Mike's Hard Lemonade. Those original malt beverages, over the past few years, have evolved into the current lines of super-popular beverages such as Captain Morgan's Parrot Bay, Seagram's Wild Coolers, Smirnoff Ice and Bacardi Silver. Concurrent with the rise of these "new" malt beverages, some interesting developments in the flavoring of distilled spirits has emerged. Orange, raspberry, pear, coconut, vanilla and even currant flavored vodkas

a ninesh

and rums are as readily available as the standards – with new flavors being introduced regularly. The popularity and success of these beverages can be attributed to several key elements. First, these new beverages were an evolution of their successful forbearers and second, these beverages embraced a new type of intelligent and innovative advertising. The advertising that emerged to market these beverages, instead of simply selling product, appealed to, and promoted the lifestyle of the target consumer. The Budweiser girls of the 80's and 90's endure, but with a less sexually blatant approach. Current marketing efforts engage the consumer by utilizing intelligent advertising in conjunction with more appropriate sexuality. Interestingly, advertising has recently pushed the limits of its history and become respectful of the audience that it targets. The leader of this pack is Absolut Vodka, whose advertising often says nothing of the product itself, but rather personifies historical figures and events with its bottles. It is this type of award-winning advertising that we intend to use as our guide for success.

1.4.2.3 Market Growth

According to Standard & Poor's (S&P), the near-term outlook for the U.S. alcoholic beverage industry as a whole remains positive, despite continued economic uncertainty in the United States. Consumer demand for these products tends to remain relatively consistent in good times and bad. S&P believes the wine and spirits sectors should hold up well through the current economic uncertainty. For the coming years, S&P expects operating profits to grow in the 4%–5% range. Profit growth should remain strong reflecting favorable raw material costs, modest price increases and lower interest rates. In addition, profitability should benefit from synergies and cost savings resulting from the high level of merger and acquisition activity in recent years. In addition, many industry participants will benefit from global acquisition activity, which can boost volume, leverage distribution channels, and provide economies of scale. For most of this decade, operating profits for companies in the wine and spirits sectors rose 3%–4%, on average.

The spirits and wine industries have seen an acceleration of merger and acquisition activity in recent years, with large companies positioning themselves to attain improved economies of scale. Standard & Poor's believes that this activity will encourage more international alliances and acquisitions, resulting in increasing globalization of the alcoholic beverages industry over the next few years.

According to trade publication, *Beverage Industry*, the distilled spirits market continues to thrive in twentyfirst century due to several trends, including new flavored spirits and high-end offerings. For instance, although Scotch sales were generally lower in 2000, the high-end single-malt sector demonstrated a 7.6 percent rise in consumption. This gave way to a number of new single-malt Scotch products, including the introduction of a 15-year-old Glenmorangle from Brown-Forman Beverages Worldwide.

The overall U.S. whiskey segment has also seen a decline, but that hasn't stopped high-end bourbons from selling well. Handcrafted straight whiskies such as Evan Williams Single Barrel 1991 Vintage, and Russell's Reserve from Wild Turkey have become increasingly popular.

A number of high-end gins, new cognacs, premium Irish whiskies, and boutique tequilas have all debuted in the U.S., hoping to cash in on the upscale trend. Upscale vodkas are also in the mix. Import Stolichnaya saw an increase in sales by 11.3 percent over the last few years partially attributed to the fact that Allied Domecq Spirits USA acquired distribution and import rights for the vodka maker in 2001.

# "Beverage industry analysts predict yearly increases in volume consumption between 1 and 3 percent."

12 ninesk

France's Grey Goose high-end vodka saw sales increase by 175 percent in the 2000's, due mostly in part to the introduction of the orange-flavored Grey Goose L'Orange. Smirnoff, the best selling vodka in the United States, also joined the trend with its Smirnoff Orange Twist and Raspberry Twist offerings.

1.4.3 Industry Analysis

The distilled spirits industry Code of Good Practice set forth by industry watchdog the Distilled Spirits Council of the United States (see Section 1.4.3.2) has been adopted as standard operating guidelines by most U.S. producers of distilled spirits. Distribution and sales of these products relies on a complex infrastructure that supports literally tens of thousands of retailers nationwide. This is a mature industry that does not succumb to the fluctuations of the economy as readily as other, more cyclical industries. The distilled spirits industry and particularly members of DISCUS are proud of their long-standing and proven commitment to social responsibility and will continue to lead the way in this important effort.

Alcoholic beverages have long been a part of cultures throughout the world. They are important consumer products and are heavily advertised and marketed. There are thousands upon thousands of brands of alcoholic beverages.

Three major segments constitute the global alcoholic beverage trade: breweries, which manufacture beers, ales and malt beverages; wineries, which produce wines and brandies; and distilleries, which output various liquors and blended alcoholic drinks (distilled spirits & cocktails).

Beer & Malt Beverages

Beer and malt beverages are made from a "mash" of fermented barley, malt, and rice or corn. These beverages are naturally cloudy from sediment in the brews, but most commercial brewers clarify their products through advanced filtration systems. U.S. brewers frequently use additives to stabilize foam and to maintain freshness, while European brewers use these additives less often. Almost all bottled and canned beer is pasteurized in the container to make sure that any remaining yeast does not continue to ferment. Draft beer, served from large kegs in taverns, bars, and other outlets, is not pasteurized and must be refrigerated to prevent spoilage. These products ordinarily display an alcohol content of 3 to 10%.

Wine

Usually made from fermented grape juice, most wines are classified as red, white, or rose and also as dry, medium or sweet. Wine categories include vintage wines, table wines, sparkling wines and fortified wines. These products ordinarily display an alcohol content of 10 to 20%.

Distilled Spirits & Cocktails

The distilled spirits business includes two major groups: clear "white goods" such as gin, vodka, rum, and tequila; and "brown goods" such as bourbon, scotch or whiskey. Younger drinkers tend to prefer

# "NASCAR now allows the advertisement of distilled spirits on their cars."

1 nines

lighter drinks, creating increases in white goods sales since the early 1990's while sales of brown goods fell sharply. In the United States, Bacardi Rum, Smirnoff Vodka, and Seagram's Gin, all white goods are among the five top selling brands.

Other major segments in the distilled spirits category are cordials, liqueurs and ready-to-drink cocktails. Originating in Europe, cordials and liqueurs are prepared by mixing spirits with flavorings. The cordial category includes schnapps, liqueurs, crèmes and brandies. Products in this category ordinarily display an alcohol content of 10 to 40%, with some specialty products exceeding 75%.

Where We Fit In

Nineshotz falls into the distilled spirits & cocktails category, but we will consider the beer & malt beverage as well as the distilled spirits & cocktails categories for performance indicators. Nineshotz will be part of an industry which enjoys revenues in the hundreds of billions of dollars each year. This industry is dominated by companies such as those listed below:

Anheuser-Busch InBev: US\$56.4 billion (Belgium) Heineken Holding: \$24.7 billion (Netherlands) Asahi Group Holdings: \$19.4 billion (Japan) Kirin Holdings: \$16.6 billion (Japan) Diageo: \$15.7 billion (United Kingdom) Suntory Holdings: \$11 billion (Japan) Molson Coors Brewing: \$10.9 billion (United States) Pernod Ricard: \$10.2 billion (France) Carlsberg: \$9.4 billion (Denmark) Kweichow Moutai: \$8.5 billion (China) Constellation Brands: \$7.6 billion (United States) Thai Beverage: \$5.6 billion (Thailand) Wuliangye Yibin: \$4.4 billion (China) Brown-Forman: \$3.2 billion (United States) Jiangsu Yanghe Brewery: \$2.9 billion (China)

The companies listed here are the giants of the industry and many are members of the Distilled Spirits Council of the United States (DISCUS).

DISCUS has spent decades combating alcohol abuse and encouraging responsible consumption of alcoholic beverages. DISCUS has composed the Code of Good Practice which is included in its entirety on the following pages:

"DISCUS reported that spirits volume grew 2.8% in 2008 amid the worst economic recession in over 50 years, showing the strength of this market."

1 nines

## The Distilled Spirits Council of the United States Code of Good Practice

#### Preamble

The Distilled Spirits Council of the United States, Inc. (DISCUS) is the national trade association representing producers and marketers of distilled spirits sold in the United States. The members of DISCUS adopt this Code of Good Practice as guidelines concerning the placement and content of advertising and marketing materials. These guidelines have two overriding principles: (1) to ensure responsible, tasteful, and dignified advertising and marketing of distilled spirits to adult consumers who choose to drink and (2) to avoid targeting advertising and marketing of distilled spirits to individuals below the legal purchase age.

The consumption of beverage alcohol products has played an accepted and important role in the cultural and social traditions of both ancient and modern society. DISCUS members take special pride in their products and their commitment to promoting responsible consumption by those adults who choose to drink. Nevertheless, it is the obligation of each consumer who chooses to drink to enjoy beverage alcohol products in a responsible manner.

The distilled spirits industry acknowledges the problems inherent in abusive consumption of beverage alcohol, and DISCUS members remain committed to combating alcohol abuse. To that end, the industry has joined with government and civic groups in efforts to encourage responsible use of beverage alcohol products. DISCUS also actively supports informational, educational, research, and treatment initiatives in an effort to better understand, prevent, and combat abuse of its products.

#### Scope

The producers and marketers of distilled spirits encourage responsible decision-making regarding drinking of beverage alcohol by adults, and discourage abusive consumption of their products. The distilled spirits industry urges that adults who choose to drink, do so responsibly. Towards this end, DISCUS members pledge voluntarily to conduct their advertising and marketing practices in the United States in accordance with the provisions of this Code. The provisions of the Code apply to every type of print and electronic media, including the Internet and any other on-line communications, used to advertise or market distilled spirits.

DISCUS members recognize that it is not possible to cover every eventuality and, therefore, agree to observe the spirit as well as the letter of this Code. Questions about the interpretation of the Code, member companies' compliance with the Code, and the application of its provisions are directed to the Code Review Board of DISCUS.

"Approximately 196 million Americans are within the legal drinking age of 21, and approximately 120 million consume alcoholic beverages."

- or other group.
- religious topics.

## 1.4.3.3 Portion Control Statement

To do our part in promoting conscientious, responsible consumption of alcoholic beverages, Nineshotz has incorporated portion control into the design of our product. Each shotglass is engineered to contain precisely 50 mL of product, yielding an appropriate portion size for an average sized adult. Although we cannot guarantee that only one portion will be consumed, through our packaging, we can achieve positive reinforcement of portion size awareness.

1.4.3.4 Distribution Patterns

The alcoholic beverage industry relies on a well-established network of distributors and retailers to deliver its product to the consumer. As stated in the Distribution Strategy in Section 1.5.4.4, Nineshotz Corp. intends to use this pre-existing distribution infrastructure until such time that distribution of our product can be more economically achieved through an alternative method such as purchasing our own fleet.

Competition in the alcoholic beverage industry is rampant. Billions upon billions of dollars are spent annually by beverage companies on advertising. Simply put, there is no way for us to compete with corporations that have unlimited funds. It is therefore our responsibility to be smarter and more resourceful, a skill we've been honing for years. Our product will be unique, but that's not enough to create success. We must sell

"Fascination with 'cocktail culture' continues as an affordable luxury even in a fluctuating economy." 19. Driving while intoxicated is against the law. Distilled spirits advertising and marketing

#### Alcohol Content

20. Distilled spirits advertising and marketing materials should not refer to alcohol content

#### Good Taste

22. No distilled spirits advertising or marketing materials should claim or depict sexual prowess

23. Distilled spirits advertising and marketing materials should not degrade the image, form, or status of women, men, or of any ethnic, minority, sexually-oriented, religious

24. Distilled spirits advertising and marketing materials should not employ religion or religious themes, nor should distilled spirits be advertised in publications devoted primarily to

13 ninesh

our beverage for a reasonable price, and it must be a beverage that above all else tastes great. Even the best marketing and advertising will have difficulty selling a beverage that doesn't taste or look good. We want repeat customers; we also want our customers to be confident in the fact that this is the highest guality product available and have no reservations about recommending it to a friend or bringing it to a social function. It is this combination of price, taste and brand image that will allow us to compete in this massive, unforgiving industry.

The typical alcoholic beverage consumer has been portrayed in most recent advertising as intelligent, youthful and well-heeled. To this end, the beverages that are most popular today usually fall into the "trendy" category. When these consumers choose to drink in a bar or club, it's all about appearances. Companies including Bacardi and Skyy have capitalized on this phenomenon and have introduced spinoff drinks that appeal directly to this crowd. To combat these potential competitors, we intend to learn from and improve upon the foundation they have already laid. Nineshotz is advertised as an "image", that's why our branding is so important. We're not concerned with creating an image for our consumer, but more with the image portrayed in the advertising of the beverage. We monitor the buying patterns of our customers and use this information to create effective and efficient marketing plans with appropriate media placement.

The combination of reasonable price, great taste and a unique, fun and exclusive image should ensure that Nineshotz can earn its share of the distilled spirits & cocktails segment of the alcoholic beverage market in a reasonable amount of time following release.

Nineshotz Corp. has found no similar competitive product, thus we can only make general comparisons with products in the same basic class as our beverages. Section 2.0, Competitive Products contains a complete list of products which have at least one characteristic similar to Nineshotz. This list is broken into four categories, (1) Mixed Drinks & Cocktails, (2) Spirits, (3) Malt Beverages and (4) Beers.

1.5 Strategy and Implementation Summary 

Business analysts constantly reiterate that if a company can keep its eye on the goal, success is much easier to achieve. To this end, our business strategy keeps in line with the theme of this document and the Nineshotz image as a whole; keep it simple, don't overcomplicate. Our main strategy is to stay focused on the bigger picture. We sell a very unique product in a large demanding market and for this reason alone we must remember to always stay focused on our product and the future of that product. Sections 1.5.1 through 1.5.7 provide a detailed description of our business strategy and how staying focused will allow Nineshotz to flourish in this monstrous, unforgiving industry.

The tactics that underline our primary strategy of focus include three main points (1) Product, (2) Innovation and (3) Brand Image.

"U.S. distilled spirit sales should benefit from industry promotion of trendy cocktails."

1 ninesk

- reminder that product is king.
- awareness that will keep us on top.
- (see Section 5.0 for further information on brand image).

"Samuel Adams Utopias has the highest alcohol content of any traditionally brewed beer, 25% by volume; and can't be sold in many states."

1.5.2 Value Propositions

Our value proposition is quite distinctive from any other in our industry. We simply offer unique, premium beverages at a reasonable price. Nineshotz popularity will stem from the fact that our product removes the time-consuming and often untidy task of mixing drinks at home or at a social function. Our product is less expensive, tastes the same every time and requires no time to prepare; it is these three things that will differentiate Nineshotz from the rest.

Our competitive edge is clear, literally. Starting with a transparent box holding nine crystal-clear shotglasses and continuing with a web-based system to let customers vote on the next drink recipe, we're looking to do things a little differently. It is exactly this distinctive, original image that we're all about, and it's this image that we consider to be our edge on the market. We strive to be a company that customers will remember. Just as Starbucks, Microsoft and Facebook began as guirky startups, our unique attitude, style and corporate culture will also one day become part of the mainstream.

The key to our marketing strategy is a simple, straight-forward approach. It's the combination of an excellent product, innovative marketing and a young, fresh perspective that will let Nineshotz succeed in this ultra-competitive market. Our marketing strategy, product packaging and external communication

1. Product: Simply put, we are a product company. Our product is the most important aspect in keeping our company alive. By putting this tactic first, it serves as a constant

2. Innovation: Along the same lines as product comes innovation. We must constantly improve and make innovations to our product reminded by the fact that tastes in this market change faster than the tides. Keeping our product fresh keeps our advertising fresh and therefore keeps Nineshotz fresh in our customers mind. It's this top-of-mind

3. Brand Image: Brand Image may be one of the most important aspects to a company's success that often goes overlooked. It's no accident that Budweiser, Coca Cola, AT&T, Apple, and Disney are the successful companies they are today; they've all created a brand that is, for all intents and purposes, a household name. The marketing for these successful companies all has one thing in common; it's an image, the same general look and feel – for everything they do. The undisputed leader in this game is Disney, whose branding has gone one step further into the fabrication of an entire "world". People travel halfway around the planet to experience that mystical Disney "magic". It's the magic that Disney sells in their ads, and it's the magic that makes Disney one of the largest revenue earners in the world. We've analyzed what Disney and these other successful companies have done, and we intend to apply these methods, albeit on a smaller scale, in the branding of Nineshotz. Our look will be uniform from the most unassuming business card to the largest billboard. From polo shirts to magazine ads, the Nineshotz brand will always be represented in a professional, exacting manner judged by the highest standards

2 ninesh

must all fit the overall Nineshotz "image" without compromise. Our image must be rock solid and the strategy which dictates this is laid out in the following sections. The complete branding and marketing plan can be found in Section 5.0 of this document.

1.5.4.1 Positioning Statement

Nineshotz is a product for people looking for something a little bit different, a little bit edgy. As our product is marketed as a "premium-luxury" product, we will produce our advertisements for this market, but position them in media encompassing a much wider financial profile. We intend to be recognized as the first truly unique alcoholic beverage in years and we believe that customers will choose Nineshotz because of the following reasons. Our product tastes great, is reasonably priced and has an exciting brand image with transparent boxes and advertising that's intelligent and fun. Being able to deliver consistently on all three fronts will be the primary reason that consumers will choose Nineshotz over the alternatives.

1.5.4.2 Pricing Strategy

Our pricing strategy is simple. We must consistently be priced less than the competition and also priced less than what it would cost to purchase the individual elements of a cocktail to make at home. Our product should flourish if we adhere to this strategy, we want to offer more for less and make it easier for the customer. For detailed information on product pricing, see Section 8.0, Manufacturers Suggested Retail Price.

Simplicity is the goal for everything related to this product, from pricing to advertising, to use of the product itself. We pride ourselves on this concept. History has shown that simplicity is often a key to success. We have extensively studied successful corporations such as JetBlue, the startup airline created by David Neeleman that blew the doors off its competitors by simply offering more for less. Better service, more amenities and a simple, targeted advertising campaign directed to an intelligent, refined customer helped JetBlue earn the trust of the traveling public. Add innovations such as in-flight yoga instruction and DirecTV satellite television at every seating position and a totally original airline was born. It is this approach to business that we intend to mimic. JetBlue's simple pricing structure, simple website with easy-to-use flight search and booking procedures and a simple advertising campaigns have given the Goliaths in the airline industry reason to flinch. Even during a time of turmoil for the airline in early 2007, JetBlue responded to critics by inaugurating a customer bill of rights, giving customers a guarantee for its service. The President of JetBlue even went as far as taking out a full page newspaper ad in every city served by the airline apologizing for the weather delays that caused the cancellation of hundreds of flights. By offering more for less and being honest with their customers and potential customers, JetBlue and other airlines like Southwest and Europe's EasyJet have caused a shift in the airline industry. We intend to take the same basic philosophy and apply it to the U.S. alcoholic beverage industry.

"SKYY has become a major U.S. vodka manufacturer, selling over 2 million cases per year."

a ninesh

Because Nineshotz Corp. is a new entity, we understand that we will have to prove our company's worth to distributors and consumers in order to earn their respect and business. In addition to our out-of-home media advertising campaign, we will use a network of local promotion companies to "spread-the-word" during our product launch phase as well as throughout each products' life-cycle. It is these promotions which raise top-of-mind awareness and attach a "brand image" by associating Nineshotz with these types of social events.

We are also planning a line of promotional products such as t-shirts, hats, key chains and similar items to be distributed free of charge at these events. Every item is to be imprinted with at least the Nineshotz logo. If there is appropriate room on the promotional item in question, the web address will also be listed. An adequate inventory of premium promotional items will be warehoused so that consumers can purchase these items from our website nineshotz.com; these items will include high-quality polo shirts, golf and baseball caps, pens, collector shotglasses, gifts, etc. We intend to drive as much traffic to the website as possible by using the aforementioned voting system for future drink recipes, Vote-to-Win drawings, and a calendar of Nineshotz events with taste-testing locations only available online.

## 1.5.4.4 Distribution Strategy

Nineshotz Corp. intends to take advantage of pre-existing distribution infrastructures. Our beverages will be produced at a bottling company that has an established distribution method. We have included distribution and warehousing into our agreement with our bottling company. Our target retailers include large corporate owned and smaller privately owned chains, but we will include every sales outlet that becomes available. Smaller stores that are served by our local distributors will also be included. The performance of Nineshotz Corp. will be indelibly linked to the performance of the distributors and retailers that are involved with the sales of our product. It is therefore paramount to the fulfillment of our business objectives that we cultivate customer loyalty with a network of distributors and retailers that are both well established and currently known for selling the types of products we offer. See Section 2.0, Distributors and Retailers for further information on this topic.

Additionally, we would prefer to pay manufacturing employees on a per-unit-packed basis, providing motivation for completing more units per shift. This fair pay strategy will again lower burden on operating expenses. Employees who have direct control of their earnings are typically more motivated and more productive than hourly-paid employees.

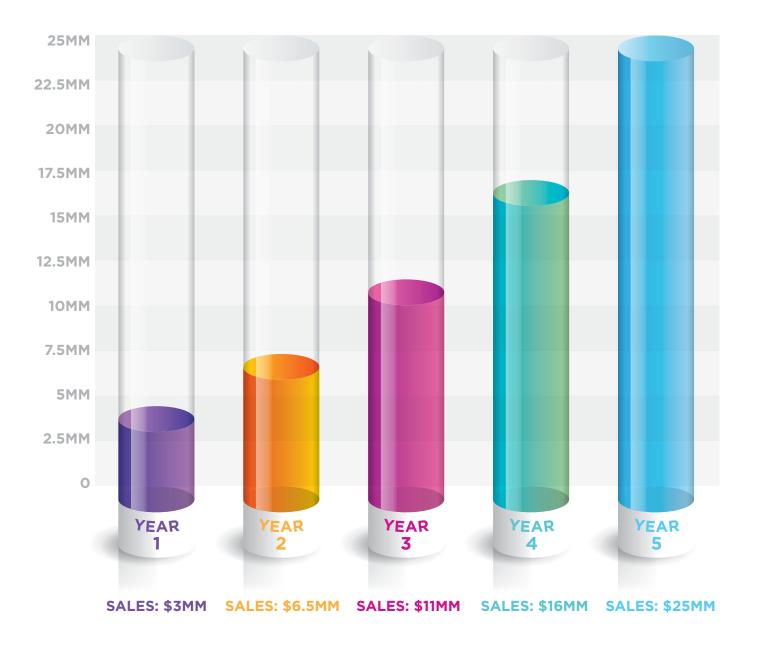

1.5.4.5 Marketing Programs

Nineshotz most important marketing program is our out-of-home media campaign. It is this type of "largerthan-life" media that is needed to create the brand awareness we are seeking. A series of billboards have been created and will be posted in locations deemed by the Executive Team to be (1) effective and (2) appropriate. Additionally, a fleet of logo vehicles will be used in launch cities concurrent with promotions in that city. We will follow the guidelines of the DISCUS Code of Good Practice in the placement of these billboards. The Executive Team will be responsible for overseeing the purchase, production and placement of the billboards.

# "Americans purchase over 40 million cases of vodka per year."

SALES FORECAST Data from 60-month Proforma Estimates\*

## **Key Data**

Current gross margins for Nineshotz products vary from 18.58% to 41.12%. These margins will increase significantly as we gain efficiencies by ordering supplies in higher quantities. Our goal is to reach a gross margin of 50% average across all product lines by FY 2021.

\*These estimates were compiled by Accell CPA's using the most conservative forecasting model. The full proforma spreadsheet is available upon request.

Marketing will be in the forefront of every decision at Nineshotz; it will be a daily task rather than a yearly chore. We are passionate about our product and the marketing and branding that backs it. This solid, well-planned marketing program is the foundation on which we will build this company.

1.5.5 Sales Strategy

The first element of our sales strategy will be maintaining our position within our key sales channels. We depend on keeping those key channel sites happy, serving their needs and serving their customers. We also recognize that a few key decision makers in the main stores are critical to our success. We must make sure that we serve their businesses well and communicate on a regular basis.

Detail is the second element of our sales strategy. We intend to make sure that the product leaving our warehouse is of the highest quality with no defects in mixing, bottling or packaging. Nineshotz Corp. will not tolerate any variation in the quality of our product, advertising or brand image. These three factors will be constantly reviewed and adjusted as needed by the Executive Team.

The graph to the left shows sales forecasts for the first five years of operation.

Sales to the end consumer (via advertising) will be done through the programs detailed in Section 5.0, The Brand. Sales to potential retail stores and distributors will be done by our in-house reps, and paid representatives or "brokers" in person. We will also direct an initial letter of information to local privately-owned retail outlets to give them the ability to stock our product immediately preceding the launch of retail sales.

We intend to forge an alliances with retailers such as Total Wine & Spirits and ABC Fine Wine & Spirits to generate additional support during launch and for research in conjunction with our future product lines. Over the past several years, ABC has revamped its image and is now aligned with what we consider to be the preeminent alcoholic beverage retailer in the Southeast U.S. while Total Wine is expanding at a feverish pace. With hundreds of retail locations in these chains, we will benefit greatly from our strategic alliances by gaining access to a loyal, pre-existing customer base, retail locations for tasting opportunities and a forum for new product innovation and introduction. We will need to ensure that the personnel and management of these chains are aware of our appreciation regarding their support and reciprocation.

1.5.7 Milestones Overview

For a detailed explanation of corporate activities to date, see Milestones in Section 6.0. The milestone schedule indicates our emphasis on planning for implementation. What the table doesn't show is the commitment behind it; we will hold monthly meetings to discuss any variance in the course and to make necessary corrections.

nineshotz

#### 1.6 Management Summary

Nineshotz Corp. is organized into three main functional areas: (1) executive administration, marketing, sales, research and development, (2) production and shipping, and (3) accounting, legal, insurance and licensing.

Over a decade ago, Mr. Pascucci recognized a huge, untapped market in the alcoholic beverage industry so he created the brand, Nineshotz Premium Alcoholic Beverages to fulfill the needs of this market. Mr. Pascucci has overseen every aspect of the development of both the brand and the product, from engineering to formulation. His professional career includes over 20 years in advertising, marketing, and sales with a client book of many well-known companies including the Tampa Bay Times, Latitude Margaritaville, the City of Tampa, WMNF, Hyatt Hotels, Target Stores, HMY Yachts, Seven Marine, Intrepid Yachts, Hatteras Yachts, Salon Lofts, Joshua House, The Children's Home Society, The University of South Florida, USPS, the Florida Humanities Council and StageWorks Theater. Chris is a published author having released From Bang to Bang: A Normal Guy Explains the Universe (And Probably Offends the Entire Scientific Community) in March of 2017 and he is a graduate of the University of South Florida.

Mr. Ramsumair's professional career in Systems Engineering & Architecture has provided him a breath of experience working for corporations throughout the United States. His focus on analyses and determination of the root cause of diffcult problems provides him with insight to advise and assist these companies to improve their customer outcomes and ultimately develop a better product. Amith also prides himself in understanding the people around him and works hard to align their personal "why" to company goals. Always looking for the next challenge, he sees the untapped potential in Nineshotz and will help execute and deliver this product to an international audience.

## Mr. Shalen Patel | CFO

Certified Public Accountant and University of South Florida graduate, Mr. Patel's experience and professional goals are well suited to the needs of the Nineshotz Corporation. Shalen has worked for PricewaterhouseCoopers LLC as an in-charge for firm audit engagements including the management of staff members and client personnel. Mr. Patel has an in-depth understanding of SEC filing requirements as well as standardized accounting and reporting procedures.

## Mr. Peter Pascucci | Board Member & Director of Operations

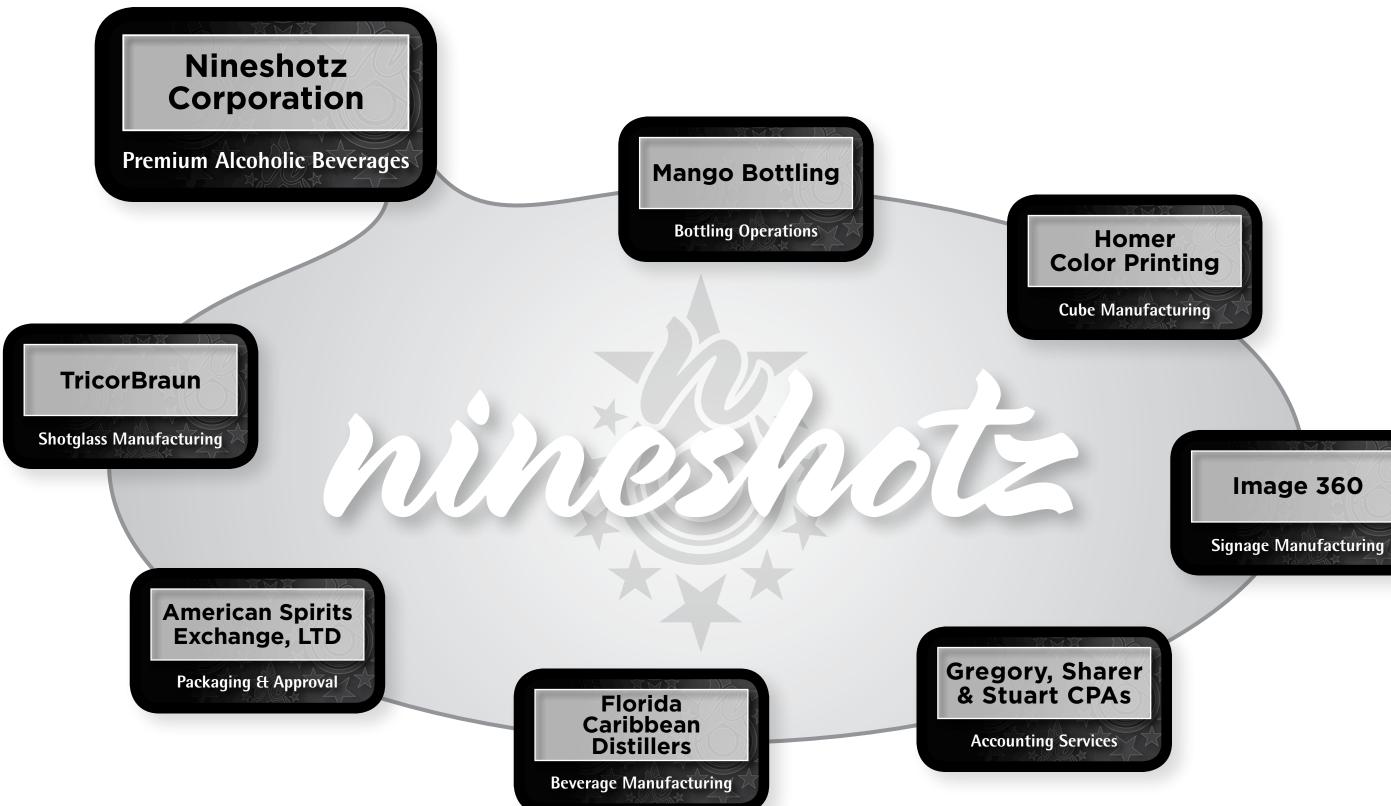

A veteran of the residential and commercial construction industry, Peter uses his extensive engineering training to oversee operations and ensure quality control at our manufacturing plant at Mango Bottling in Cocoa, Florida. His decades of experience in land development, contract negotiation and project management for companies such as Coastal Bay Realty, Oxford Development, Summit Properties and Centex Homes are a great asset to the Nineshotz Corporation. Peter is also a Life Director of the Tampa Bay Builders Association and a Life Director of the Florida Home Builders Association.

## Mr. Christopher S. Pascucci | Founder, Chairman & CEO

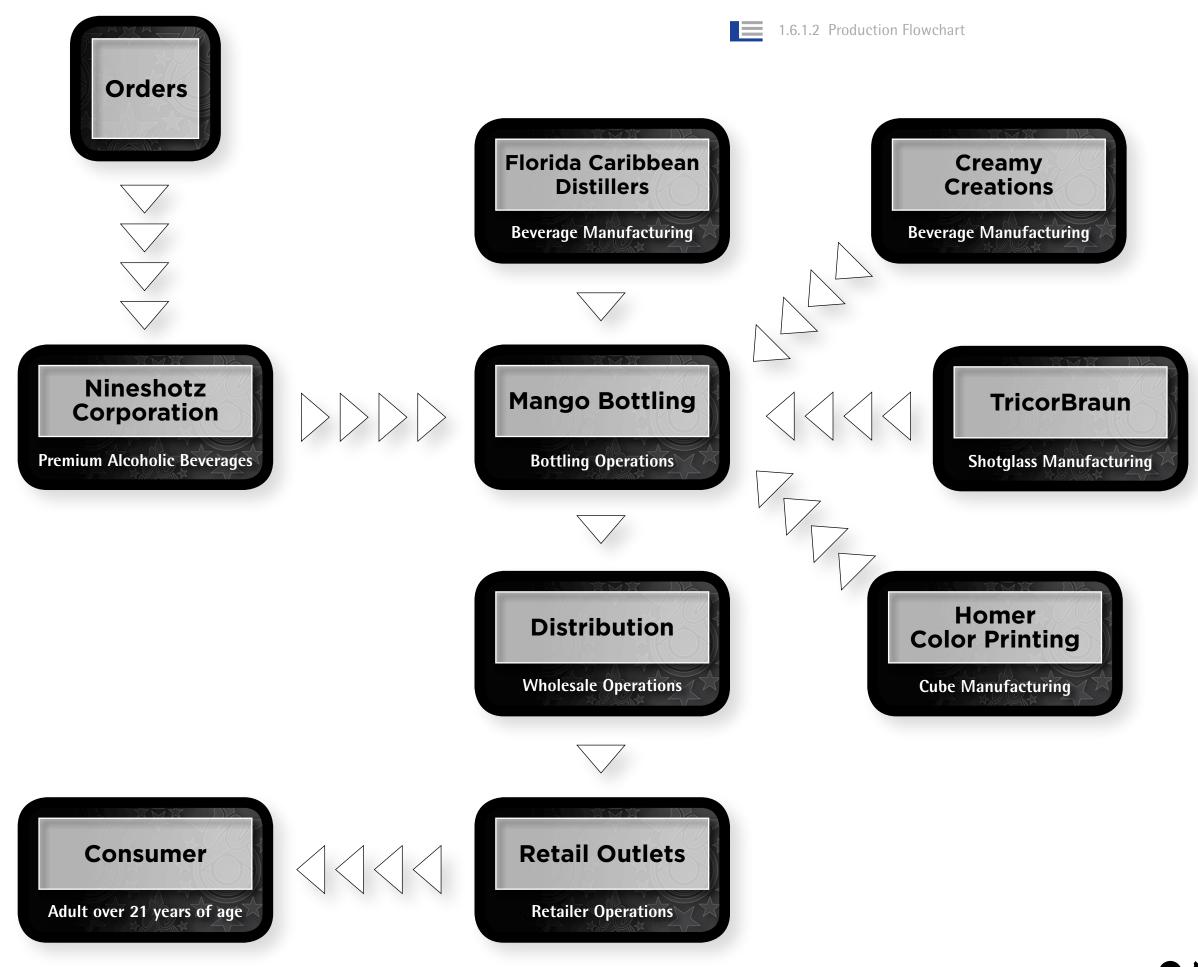

## Mr. Amith Ramsumair | President & CIO

a ninesh

1.6.1.1 Organizational Flowchart

🛛 nineshotz

1 nineshotz

Office staff including an Executive Assistants and a Sales/Promotions Manager will be added during first year of full operation.

The cornerstone of the personnel plan is to maximize production and minimize the labor burden on Nineshotz Corp.'s operating expenses. Until increased sales can support additional salaries, the Executive Team will oversee operation of the corporation with salaries as proposed in the attached Pay Summary in Section 4.0. The sales and administrative positions will be paid a salary dictated by local salary surveys for similar positions (sales positions will also receive bonus pay as described in their individual pay plans). Accounting services and legal fees will be paid as needed by a line item in the Corporate Overhead section of the Pro Forma Operating Budget in Section 7.1. Additional need for help at the corporate level will be analyzed and implemented as the budget allows. Drivers for the logo vehicle fleet will most likely include employees, friends and family members rather than paid drivers during the startup phase of operations.

1.7 Financial Plan

Nineshotz Corp. is seeking a financial package based on the requirements set forth in this plan. It should be noted that the management of Nineshotz Corp. does not propose to take any profits out of the business until investment debt has been satisfied, however, profits remaining after the arranged debt repayment should be used to finance growth, mainly through the acquisition of additional retail outlets and furthering the reach of our advertising campaigns and distribution channels to additional states. It is our goal to attain regional and then national distribution as soon as demand and capital permit.

1.7.1 Important Assumptions

The financial plan depends on a few important assumptions, several of which are shown in the table to the left. The key underlying assumptions are:

We assume a stable, slow-growth market as described in the DISCUS Year-in-Review (2018).

We assume that there will be no unforeseen changes in the popularity of alcoholic beverages with the general U.S. and world populations which would make our products obsolete any time in the near future.

We assume that there will be no radical changes to U.S. or international law related to the purchase, sales, distribution or consumption of alcoholic beverages.

We assume access to equity capital and financing sufficient to maintain our financial plan as detailed in this document.

## GENERAL ASSUMPTIONS

@ ninesh

BREAK-EVEN ANALYSIS Chart

Our key financial indicators for charting and forecasting expenses will be the following:

Inventory Turnover: We must ensure that our inventory of beverages as well as packaging and raw materials turns over at a specified rate to avoid a negative impact on our cost of goods sold and cash flow. This rate will be more accurately estimated before product launch and verified and/or adjusted when sales data from the first few months of operations becomes available.

*Collection Days:* Collection can be handled many different ways and it may be too early to determine the best course of action for this subject. It may, however be necessary to implement a variety of payment terms with different parties, depending on their payment history. In extreme cases, prepayment of orders may be the only extendable terms.

Gross Margins: We will monitor our sales numbers and forecasts to determine the best gross margin percentage for the given quarter. In addition to this, we should hold marketing costs to a level where our sales numbers return our predicted gross margin percentage. These levels will be determined after product launch.

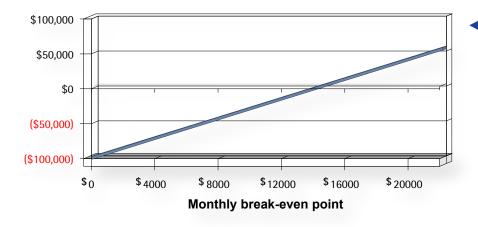

1.7.3 Break-Even Analysis

The chart to the left illustrate our break-even analysis for the first year of operations.

We will use data obtained during pre-launch negotiations with vendors and post-launch data from sales figures to prepare expense forecasting reports. These forecasts will need to be updated at regular intervals, allowing us to compare forecasts on a monthly basis and make changes as necessary.

Initial marketing expenses as shown in the budget are relatively high as we seek to become known in the market. We should expect to commit more funds to our advertising programs than a conventional business due to the market conditions of this industry. Expenditures in this area will include advertising campaigns, literature, press, functional expenses, etc. As our market share increases and capital is generated, further marketing programs and the expansion of those already in existence will be undertaken, to ensure market development.

1.7.5 Business Ratios

The table shows projected business ratios. The Industry Profile columns show statistics for NAICS Code #424820, Wine and Distilled Alcoholic Beverage Merchant Wholesalers. Being that this is a startup business, it will be difficult to make comparisons to industry standards during the first few years of operation. Information obtained from <u>www.naics.com</u>.

2 nineshotz

1.8 Legal Considerations

1.8.1 Intellectual Property

Most of Nineshotz Corporation's intrinsic value is in the form of intellectual property. To this end, the information that is held by the corporation will and must be protected. Legal protection will be of paramount importance to defend the brand and its unique attributes. This information includes, but is not limited to, electronic and proprietary data such as engineering drawings, flavor recipes, website programming and user data, etc. Copyrights, patents and trademarks will be applied for where applicable. Further information on intellectual property can be found in Section 5.8 of this document.

We have formed a partnership with American Spirits Exchange LTD for our state licensing requirements. ASE will oversee all permitting and regulatory matters, taking the burden off our plant staff.

1.8.3 Corporate Position on DUI Law

Nineshotz has a very firm stand on DUI law. It is our official position that DUI convicted drivers should receive harsher penalties for driving under the influence of alcohol. To that end, Nineshotz will promote imposing harsher punishment and fines for alcohol related DUI incidents/accidents. As an accountable member of the alcoholic beverage manufacturing community, we must commit ourselves to enforcing the responsible use of alcoholic beverages and equally to keeping drunk drivers off the roads.

1.9 Banking and Credit

In addition to C.O.D. payment terms with several of our manufacturing partners, corporate banking accounts have been set up with Iberiabank and credit has been established with our suppliers and vendors.

"Bacardi makes and sells more rum than anyone else in the world."

4.0 Pay Summary

4.1 Salaried Reimbursement

To keep salaried reimbursements and therefore payroll taxes to a minimum during the launch phase of Nineshotz, the salaries paid to employees will be below the current national average, but will be a fair wage for services provided. Alternative reimbursement methods in the form of bonuses, paid vehicle privileges and paid expenses will be used to compensate for lower base salaries.

The personnel plan to the left is based on a starting salary of \$8,000 per month for the CEO, adjusted upward once certain sales levels are reached. Other salary expenditures will come online after launch and will include the President/CIO, executive assistant and sales executive positions. Sales positions will be paid by commission on their individual sales performance.

Included is a national salary survey from the U.S. Department of Labor, Bureau of Labor Statistics for "Chief Executives", obtained from www.bls.gov.

**Occupational Employment and Wages Survey** Category: 11-1011 Chief Executives Function: Determine and formulate policies and provide the overall direction of companies or private and public sector organizations within the guidelines set up by a board of directors or similar governing body. Plan, direct, or coordinate operational activities at the highest level of management with the help of subordinate executives and staff managers.

4.2 Bonus Plan Description

A bonus plan, based on sales revenues will be set forth in applicable Executive Team employment agreements. Bonus plan details will be negotiated upon employment.

In order to employ a practice of equal pay, a graded pay system similar to government organizations will be employed. Each position will have a detailed job description, allowing employees to be evaluated fairly and efficiently.

5.0 The Brand

5.1 Introduction

5.1.1 Who is Nineshotz?

Nineshotz as a brand would best be described as an 'exclusive luxury' product. For the purposes of planning advertising activities, we will use the 'premium' market as a guide. With the proliferation of luxury goods into "middle-class" territory, products that a have a high-perceived-value and advertising directed towards "upper-class" consumers have shown better performance than products in other segments of the market. We will use some of the basic concepts associated with this trend in the planning of our marketing strategies.

For the purpose of this document, the following terms are defined herein:

logo ~ (Pronunciation [loh-goh]) –noun, plural -gos

abbreviation, etc., often uniquely designed for ready recognition.

seal ~ (Pronunciation [seel]) - noun

1. A mark, sign, symbol, or the like, serving as visible evidence of something.

branding ~ (Pronunciation [bran-ding]) -noun

- 1. To mark to show ownership.
- 2. To impress firmly; fix ineradicably.
- 3. A trademark or distinctive name identifying a product or a manufacturer.

advertising ~ (Pronunciation [ad-ver-tahy-zing]) - noun

- on billboards or busses, etc.
- 2. Paid announcements; advertisements.

marketing ~ (Pronunciation [mahr-ki-ting]) -noun

consumer or buyer; including advertising, shipping, storing and selling.

5.1.3 Brand Identity and Master Brand

Our brand identity is one of the most important aspects to our company's success. In order to explain our branding goals and to maintain continuity throughout all of our marketing collateral, these brand guidelines have been prepared.

It is the goal of our brand awareness campaigns to create a widely recognized consumer product synonymous with great quality, taste & value. The Nineshotz brand will always be represented in a professional, exacting manner judged to the highest standards.

1. Also called logotype. A graphic representation or symbol of a company name, trademark,

1. The act or practice of calling public attention to one's product, service, need, etc., especially by paid announcements in newspapers and magazines, on radio or television,

1. The total of activities involved in the transfer of goods from the producer or seller to the

3 nineshotz

In today's crowed alcoholic beverage marketplace, it is becoming increasingly difficult for a product to be noticed and remembered. The visual clutter and similarity between many products often overwhelms consumers when purchasing an alcoholic beverage. There are so many products to choose from when shopping at a beverage retailer, that it becomes extremely difficult to stand out. To this end, we have developed an easily recognized "master brand" that will be suitable for use in most external media communications. In addition to our unique product packaging and powerful logo and corporate seal design, our master brand style has been designed to create and reinforce strong brand awareness.

Benefits of a strong brand identity include:

- Heightened public awareness of the Nineshotz brand
- Differentiation from competitors
- Easier access into new target markets
- Enhanced awareness of the Nineshotz product line and our marketing efforts

In order to create an effective and unique corporate image or "master brand", we must ensure the proper use of the following communication tools:

- Our logo and corporate seal
- Appropriate headline and tagline copy
- High-quality product photography
- Consistent use of type
- Consistent background art and conformity to our general artistic style
- Prize offerings where applicable
- Appropriate and effective media placement

5.1.4 Who should use these guidelines?

Every staff member will be required to adhere to these branding guidelines. Additionally, any vendor doing business with Nineshotz Corp. will be made aware of and must conform to these branding guidelines.

5.1.5 How should these guidelines be implemented?

Compliance with these guidelines will be stringently managed utilizing our Corporate Brand Review process described in the next section of this document.

5.1.6 Corporate Brand Review (CBR)

In order to maintain a consistent, unified image, a Corporate Brand Review (CBR) function has been designed into the approval process for marketing communications. There are two steps to the CBR process, Review and Approval. See next page (pg. 39) for CBR procedures. (A copy of the CBR Approval form can be found in Section 9.5 of this document.)

- Color usage: primarily black and white in the background with attention to full-color product images

3 ninesk

Prize Offering (if applicable)

The review process has been established to guarantee that all marketing communications meet our extremely high expectations. All materials that will be viewed by the general public must be presented for CBR and

Once a project has been submitted for CBR and approved, it will be returned to the art department with an approval form (this notification may also be transferred electronically). If it is not approved, notation of necessary changes will be included and the project will be returned for revision. We understand that this approval process may create extra work for the Executive Team, but it is of paramount importance that we

For ease of both CBR approval and layout by graphic artists, there are pre-existing templates for most pieces or our collateral, both print and web. The art for these documents is stored on our servers. Many references will be made to art stored on company servers throughout these guidelines. Access to the server and these files will be granted on a permission based system. Currently all files are kept on company servers with a backup in off-site secured storage as well as an additional copy on our cloud service. Our server drives contain items saved in many different file formats. The standard software applications are as follows:

It is also important to note that in order to conserve disk space; graphic files built with Adobe InDesign will contain links to master art files on company servers. These links will include files such as background art,

It is, and will always be, the goal of all our marketing efforts to establish the Nineshotz brand as the preeminent product of its kind in the alcoholic beverage industry. The sample print advertisement to the left contains all of the branding elements currently used by Nineshotz. A detailed explanation of each element

1 ninesha

### Corporate Seal & Logo

The corporate seal & logo are the most important branding elements and must be used on ALL of our visual communications. The logo should never be re-typeset, altered or modified in any way. DO NOT horizontally or vertically adjust the logo to fit an application, if it is stretched or compressed, the project will not receive CBR approval. Vendors using the logo must be made aware of and accept the terms of these branding guidelines before any work is completed by their company. If logo deviations are made by a vendor and released to the public, legal action may be taken upon that vendor.

The corporate seal & logo are a key design element of the Nineshotz master brand visual artwork. This corporate seal is both a stand alone design element and one that can work in conjunction with either an ad headline or with the logo. Do not adjust the horizontal or vertical scale of the seal or change it in any way. Do not use the corporate seal in sizes less than 1.25" in height.

## **Product Photography**

This is undeniably a huge part of the Nineshotz master brand. Product photography should be used in every circumstance possible during Campaign Version 1.0 (CV1.0). In future campaigns, we may choose to highlight other portions of the brand including lifestyle concepts, social gatherings or event sponsorships. For the purposes of CV1.0, brand recognition is our only goal, thus, every piece of visual communication that can feature a reasonably sized (3"x3") image, should attempt to include at least one piece of product photography.

### Headline

Headlines are typeset in the **Gotham** family of fonts in varying point sizes. In Adobe InDesign, preferably **Gotham Black** or **Gotham Ultra**. Do not use a stroke or make this type form any bolder than it already is.

## Background Art / Image

In Campaign Version 1.0 (see Section 5.3.1 of this document for a description of Campaign Versions), we are using the "Black-on-Black" color scheme. The background artwork is composed of a translucent repeating corporate seal pattern on a fading black background. This effect creates a subtle backdrop that allows our advertising information, most importantly product photography, to really stand out. The "Black-on-Black" color scheme was designed to both blend in with the ad information and to reinforce brand awareness. In future Campaign Versions and under special circumstances, background imagery may be called for. In this scenario, the Executive Team may give recommendations on appropriate photography or graphic imagery to the art department or agency involved – this will be managed on a project-by-project basis.

1. Freedom from 2. Nineshotz Prei

## **Flavor Stickers**

Flavor stickers are more than just a graphical representation of the flavor name, but also act as a road map to what the drink flavor is comprised of. Our flavor names will often have nothing to do with the actual flavor of a drink, resulting in the need to comment on the drink's composition in a visual way. At the bottom of every flavor sticker, three visual indicators give a good description as to the flavor of that drink. The large fruit icon on the left is the primary flavor component, the central icon, our base drink identification icon, defines the base drink (ie. Margarita, Martini, Long Island Iced Tea or Mixed Cocktail). The fruit icon on the right is the sub flavor, or "twist" flavor. The drink description for the King Apple flavor indicates that it is a green apple and kiwi shot with the base drink being a martini.

1 ninesh

### Website

The website address or web address is the second most important piece of the branding elements. After the logo, the web address should be used in every instance possible. Nineshotz apparel is a good example of the usage of these two elements – Nineshotz shirts, should have the logo on the front and the web address on the back of the shirt below the collar. Font is **Gotham**. When typing the web address, it is not necessary to put "www" in front of <u>nineshotz.com</u>. There is also a outlined version of the web address that is the preferred method of use.

eveal nine premium private Collection none of the mess olic Beverages are a store near you. Enjoy responsibly.

## Сору

Copy will be typeset in **Gotham** font in varying point sizes. Copy will be provided by the art department and subject to CBR approval before being used in an ad. Usage is the same for copy fonts as headline fonts regarding point size and stroke.

# vote f © 2019 Nineshotz I

## Mandatories

For legal purposes, the following disclaimer must be on every piece of advertising:

© 20xx Nineshotz Premium Alcoholic Beverages XX% Alcohol by Volume Nineshotz Corp., Cocoa, Florida \*Details at nineshotz.com Enjoy Responsibly Font: **Gotham** 

(\*Note: Details at <u>nineshotz.com</u> only necessary on ads with prize offering.)

## **Prize Offering**

To reinforce brand awareness and drive traffic to our website, we will employ a "Voteto-Win" prize reward system. Further information on this program is available in Section 5.3.6.4, Vote-to-Win Drawings. In regards to prize offerings in advertisements, we are legally bound to provide the details of this contest. Contest rules and regulations will be available at <u>nineshotz.com</u> on both the "About" and "Index" pages.

@ ninesh

### CORPORATE SEAL AND LOGO Usage and Area of Non-Interference

Logo

Corporate Seal over Logo

Using the large star at the bottom of the seal as a visual quide. Leave a minimum of the height of one star around all 4 sides of the seal, leave more space when available.

the seal, leave more space when available.

**Corporate Seal loses definition as its** size is decreased

Logo has a simpler design, better suited to small applications

nineshotz nineshotz nineshotz

5.2.3 Corporate Seal and Logo Usage

Examples of corporate seal and logo usage can be found in the images to the left.

5.2.3.1 Area of Non-Interference

The area of non-interference is a buffer zone that surrounds the logo and corporate seal to prevent the encroachment of other graphic elements. The minimum clear space surrounding the corporate seal is equal to the height of the large star at the bottom of the seal. The minimum clear space surrounding the Nineshotz Logo is also the height of the large seal star, but can better be described as the distance from the top of the letter S to the top of the letter H in the logo. This is only the minimum amount of clear space; more space should be used whenever possible. See images to the left.

As bright, flashy colors may be of importance to other products, Nineshotz takes a more artistic approach to our visual communications. With the exception of our product photography, all of our artwork is drawn in black and white. This simple 2-color approach is primarily for visual impact, but also for economics. Without having to print special Pantone inks, our production costs will be much lower depending on the complexity of the piece.

5.2.3.3 Unacceptable Uses

- DO NOT condense, stretch, skew, manipulate, modify or redraw the corporate seal or logo
- DO NOT create logo combinations that are not approved logo and corporate seal uses
- DO NOT print type or other elements inside the area of non-interference
- DO NOT re-typeset the logo
- DO NOT print the corporate seal or logo in a screen or texture

5.2.4 Typography

Typography unifies our brand image by ensuring consistency and continuity. We use two font families, Rotis Semi Sans and Gotham. Rotis is a clean, easy-to-read sans serif typeface that provides contrast to the technical feel of the sans serif **Gotham** font family. The typeface used in this document is **Rotis** Semi Sans, but typically, print ads and sales materials will use the **Gotham** family.

Rotis Semi Sans: ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopgrstuvwxyz 1234567890 Gotham Black: ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 1234567890 Gotham Xtra Narrow Light: ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 1234567890

No deviation in this font usage will be accepted, unless deemed necessary by the corporate office on a project-by-project basis.

vote for the next flavor and enter to win at nineshotz.com

### PRINT ADVERTISEMENT 10" x 12" Magazine/Newspaper Ad

Set headlines flush left, to the right of the corporate seal.

Always use ALL lower case type for titles.

Use drop shadows as per the art templates. When designing in Adobe InDesign, occasionally in unusually dark parts of a drawing, the item with the drop shadow might have to be copied and then pasted into place above the original element in order to double the shadow effect. This gives approximately 200% shadow, but is only to be used on the darkest of backgrounds. For use on light or white backgrounds, only a 10-15% drop shadow might be needed. Adjust drop shadow use accordingly.

Do not adjust kerning in titles or body text.

Use discretion on leading, not too tight, but not too loose; Rotis & Gotham are both fairly easy fonts to work with. In Adobe InDesign and Adobe Illustrator, the default text values work well 9 out of 10 times.

Body copy should be set flush left, ragged right; or set flush right, ragged left depending on the scenario.

5.3.1 Campaign Versions

The launch campaign for Nineshotz is Campaign Version 1.0 (CV1.0). This includes the "Black-on-Black" background art (as discussed previously) and bright, colorful product photography. The sole purpose of this campaign is for brand and product awareness. Different campaign versions may be used in different markets at different times; explaining why we number our campaigns.

Campaign Versions

CV1.0 – "Introduction": Brand and product awareness campaign CV2.0 - "Lifestyle": Lifestyle concepts promotion CV3.0 – "Event": Social function or sponsorship CV4.0 - "To be determined"

When an adjustment is made to a campaign, it will continue to the next sub number, i.e. a new version of CV1.0 would be known as CV1.1, etc. The reason for a campaign adjustment may be for demographic purposes or foreign languages. A complete list of active and inactive campaign versions will be maintained at all times by the art department for easy reference by the staff and Executive Team.

For CV1.0, use the art templates as a starting point for creating new pieces.

**PRINT ADVERTISEMENT** 20" x 12" Sample Double-Truck Magazine/Horizontal Newspaper Ad

### CV1.0 will serve as both our Master Campaign and Master Brand.

5.3.4 Taglines

CV1.0 will not make use of a singular tagline that accompanies the logo, but will make use of several different taglines specific to the media requirements (i.e., outdoor, print, etc.).

5.3.5 Print Advertising and Publications

Refer to Branding Elements in Section 5.2.1 of this document for a detailed guide on the graphic requirements of our branding elements. Artwork will be provided to the art department in template form to limit confusion of our message.

Size

Using the art templates, ads should be resized to the publications' specifications.

### Layout

Layout of resized ads should be done in a manner that keeps the design as close as possible to that of the original art template.

5.3.5.2 Local Market Customization

Local market customization will be used mostly for co-branding efforts with local vendors. Since we don't list phone numbers or addresses on ads, local market customization will be very limited.

5.3.5.3 Regional/National Market Customization

Regional and national market customization will be done on a project-by-project basis in conformity with the requirements of the regional or national vendor in question.

45 ninesh

When working with other organizations to create materials, it's vitally important to maintain our brand integrity while working within the guidelines or requirements of the other organizations. Before a new co-branding venture is established, the legal and branding requirements will be agreed upon before beginning any design work.

The basic strategy we've laid out for global brand awareness entails using Campaign Versions as discussed in Section 5.3.1. We have a unified, organized method of controlling our branding message and a very strict set of guidelines that MUST be followed in every emerging market. In conjunction with each other, these two comprehensive methods will create a singular message of brand awareness that will be recognized around the world.

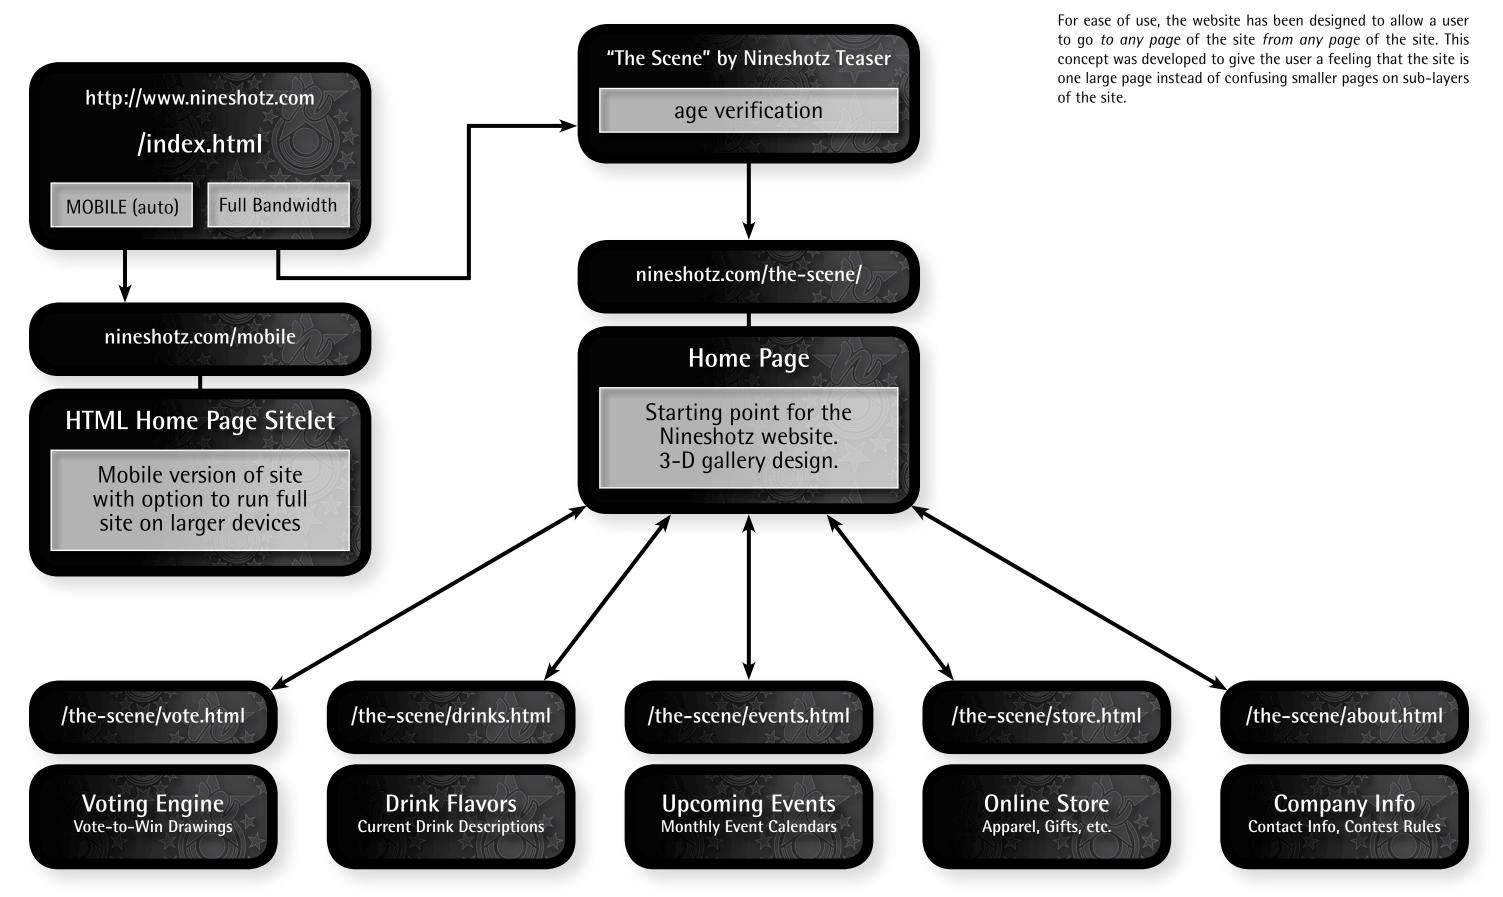

Our website, <u>nineshotz.com</u>, has been designed with two goals in mind. First, the website must accomplish its task of being our company's web presence - to this end, the site has been designed to the specifications of CV1.0, our master brand. Our approach to web design is as important as our approach to any other piece of visual communication, however, a website is by definition, an interactive application, therefore much more care must be take in the site's visual specifications and organization, see Section 5.3.6.2. Second, our website must be aligned to the goals of our business, specifically, brand awareness and customer retention. In order to accomplish this, we have researched and developed a simple yet effective method of user retention via our Vote-to-Win Drawings as detailed in Section 5.3.6.4.

Graphical elements of the website will include many of the same elements that are found in our advertisements. Additionally, our website, as described in Section 5.3.6.3, will be an interactive gallery and employ unique 3-D visual navigation tools. There will be art templates for the website and other electronic media, such as eBlasts and eVites in the art templates.

1 nineshotz

## **EVENTS** flash/events.html

DRINKS

One of the primary uses for our website will be that of a voting platform. Nineshotz will advertise "Vote-to-Win" or "vote for the next flavor at nineshotz.com" on every piece of applicable marketing collateral. Rules and regulations of the drawings will be posted on both the "Index" and "About" pages of the site.

A. Two Ways to Win - Voting and Referrals via eVites I. Earning Credits by Voting a. Registration

Registration is in the interest of both the user and Nineshotz. The information gathered by Nineshotz during registration will be the only way for us to contact someone for prize notification. It would not be to the user's advantage to enter a false e-mail address as they would forfeit any prize winnings. A user account will be created during registration to allow the user to login at their convenience to both vote in current drawings and to refer friends, thus earning credits. Facebook integration may be used if it conforms to our security guidelines.

### b. Voting

Users will have the opportunity to vote for the next shot flavor. On the "Vote" page of the Nineshotz website there will be several new flavor options to choose from during each drawing period allowing a registered user to cast a vote for their favorite flavor. The flavor that has the most votes at the end of the contest period will be the next flavor produced by Nineshotz. (See "Vote" page of the website on page 47 of this document.)

### c. Earning Credits

Users have the option to vote up to once per day after they have logged into their user account, allowing a maximum of 365 credits to be earned per year. Additionally credits can be earned by referring friends (see II. Earning Credits with eVites).

### d. Credits

When a user is logged into their account, their credit balance will show two separate counts, one for total number of credits (credits that count towards drawings during that year) and another for outstanding purchase credits. Every time a user earns a credit, it is deposited into both the "vote credits" and the "purchase credits" fields. The "votes" field will be reset every year at the beginning of a new drawing cycle. The "purchase credits" field will be a declining balance system that will enable a user to redeem credits for merchandise at the Nineshotz Online Store (see g. Nineshotz Online Store). Credits from both counts are cumulative and will be tallied for one total vote count towards purchases in the store.

### e. Drawings

Currently, new drink flavors are scheduled to be released about every 4 months, meaning that we will have three (3) drawings per year. Prizes will vary; two (2) drawings per year will be "minor prizes" and one (1) drawing will be a "major prize", like the Range Rover Evoque shown in our advertisements.

nineshotz

### **ABOUT** flash/about.html

### f. Prizes

Minor prizes will consist of items such as shopping sprees at the Nineshotz Online Store or cash prizes. Major prizes will usually consist of a full-paid lease on an entry-level premium luxury vehicle (M.S.R.P. \$40,000 to \$50,000) from manufacturers that have attractive lease rates, preferably a well regarded marque like Range Rover or Cadillac.

### g. Nineshotz Online Store

The Nineshotz Online Store will offer products both for retail sale and credit redemption. Products will include items such as the following:

T-shirt: \$20.00 or 200 credits Sport hat: \$25.00 or 250 credits Polo shirt: \$50.00 or 500 credits Nineshotz Corporate Seal / Enjoy Responsibly chrome key chain: \$75.00 or 750 credits Basic metal key chain: \$8.00 or 80 credits

It is in our best interest for people to redeem their credits to receive free branded merchandise. To ensure credit usage, monthly credit balance reminder notifications will be sent out via eBlasts (see 5.3.6.5, eBlasts).

II. Earning Credits with eVites (optional) a. eVites

eVites can be sent by a registered user to friends and family. In a users account, there is a link to "refer friends". When a user enters the name and email address of a friend, an eVite will be sent to that address. If the recipient of that eVite responds and becomes a new registered user, the original user will receive 1 credit. A user may send up to three eVites per day, allowing a maximum of 1095 friend credits available to be earned each year.

### b. Verification

As long as a friend joins and becomes a new registered user, no further verification is needed. Obviously, if an email is a fake or non-active address, the eVite will be bounced back to our server and no credit will be awarded. We will need to take precautions from persons using free email addresses and submitting phony names to earn drawing entries and purchase credits.

o ninesha

### eBLASTS

600 pixel width (similar artistic style as print advertisements)

### B. Registered User Database I. Registration Information

A user must register before voting. We will capture several fields to help us contact the user for prize notification and to enable the user to login and vote for future flavor recipes. A simple database will be maintained by Nineshotz to keep user records and tabulate votes. The database will need to keep several fields for each user, including:

First name (user supplied) Last name (user supplied) Email address (user supplied) Date of Birth (must be 21 or older) (user supplied) User number (computer generated) Drawing Credits: number of entries for current years drawings – resets yearly with each drawing cycle Purchase Credits: number of credits in declining balance format "Friend" verifications with credit cross reference (friend credits must link to another active user account) Account establishment date Date of last login

Vote credits will be kept for 1 year, allowing users to be registered for all of the drawings that year.

### II. Privacy

No information will ever be sold from the Nineshotz database. Extreme measures will be taken to maintain the security and integrity of our database information and will include the use of daily backups and off-site secured data storage.

5.3.6.5 eBlasts

eBlasts will be used for direct communication via email to registered users. These communications will include information on purchase credit balance, local events (information from our "Events" web page), upcoming prize offerings and new flavor announcements. An average of four (4) eBlasts per month will be sent, unless an unscheduled local event or special announcement dictates an additional message. A user can change their preferences to eliminate eBlasts, leaving their user account information unaffected; however, they will not be notified of upcoming drawings or their purchase credit balance.

5 ninesh

5.3.7 Out-of-Home Media

Out-of-home media will be an important advertising methods for Nineshotz. We will use a combination of billboards and logo vehicles to create a cost effective out-of-home media campaign.

General Notes

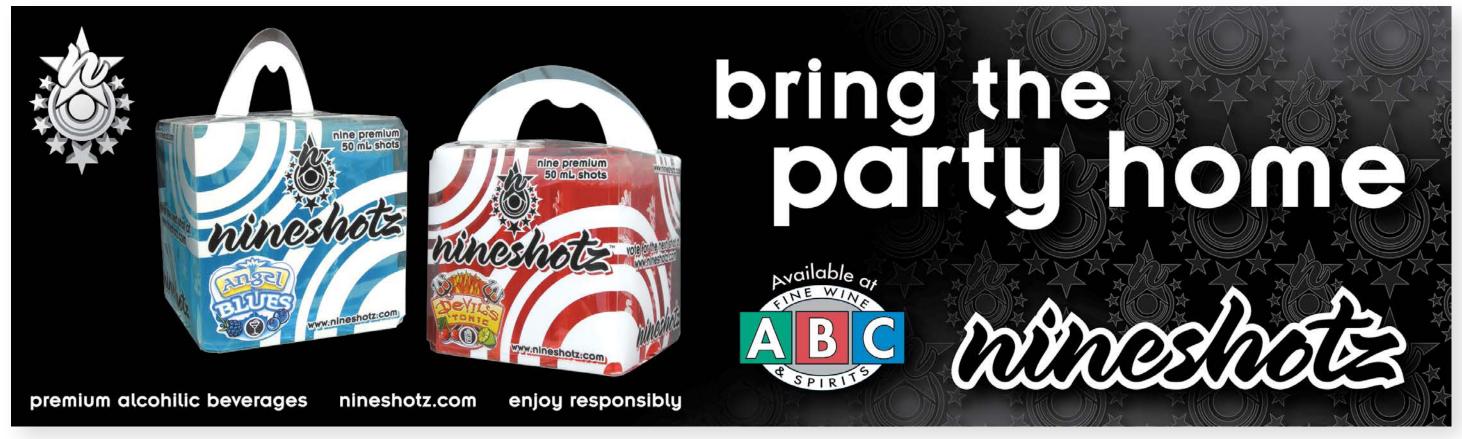

All the text on a billboard should be able to be read in less than 3 seconds (not including the logo and web address). A good rule of thumb is 10 words or less.

The message should be as clear and concise as possible.

Text on outdoor media should be easy to read and have little or no interference with other elements of the design.

Billboards will use the branding style from the current campaign in conjunction with market adjusted copy.

goes great

with friday night

manshab

premium alcohilic beverages nineshotz.com enjoy responsibly

🛛 nineshotz

Logo vehicles will be employed in emerging markets and in markets where special promotions are being staged. Logo vehicles are a relatively inexpensive form of out-of-home media that we plan to take full advantage of. The Nineshotz logo vehicles have been designed with specific branding goals in mind. The vehicles are intended to be both a bold statement in graphic design and an eye-catching reinforcement of brand awareness. Our logo vehicles have already traveled thousands of miles across the United States.

Co-branding will be a major part of our out-of-home media plan and the needs of each co-branding agreement will be determined on a project-by-project basis. The previous page shows an example of a typical installation of out-of-home media.

Other out-of-home media will be determined on a project-by-project basis, but may include such items as bus stop signs, signage in sports venues, event signage, etc.

5.3.8	Broadcast	Media

Detailed scripts and/or storyboards will be developed for radio and television advertising once a firm broadcast media purchase plan is established.

Radio advertising will be purchased in a very cost conscious way. The use of shorter radio spots and tags will be a large part of our radio media plan. Scripts and voice-over talent will be determined once the broadcast media plan is established.

Television advertising will be purchased once a particular market can support television media. Storyboards, talent and filming will be determined once the broadcast media plan is established.

General Notes

ALL television commercials will be shot in 4K 16x9 format.

5 ninesh

5.3.9 Stationary Package

5.3.9.1 General Stationary

Business correspondence is a basic but important way of presenting our image. A variety of audiences receive information from us as typed letters, business cards, mailing labels or other kinds of stationery. Maintaining consistency within our stationery system will reinforce our brand image.

In order to maintain our branding standards, ALL stationary will be provided by the corporate office.

5.3.9.2 Internal Forms

Corporate forms play an important role in the day-to-day operations of our business. Forms are used for every purpose, from memos to ordering supplies. Additionally, some forms will be used for external communication, so every form must conform to our branding guidelines. Forms will be created by the corporate office.

Production art is, in actuality, vector based engineering drawings that contain proprietary information of the Nineshotz Corporation, thus, visual specifications of these items will be kept encrypted with a backup stored in secured off-site storage.

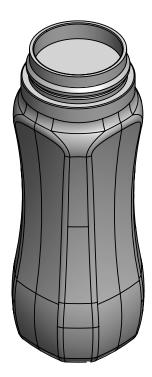

Thousands of man hours have gone into making the Nineshotz Cube an elegant, simple piece of packaging art. More than 185 design revisions and engineering mock-ups have been completed over the past five plus years of research and development.

The following page details an unfolded version of the production-ready Nineshotz Cube.

Like the Nineshotz Cube, the shotglasses are another example of simplicity in form and function. Designed to be lightweight, easy to hold and strong enough for packaging and shipping, the shotglasses are made from alcohol resistant PET plastic resin. Each shotglass is designed to hold 50 mL of product, yielding 450 mL per cube. With 10 cubes per case we will conform to the industry-wide standard half case volumes of 4.5 L.

Launch Flavor

red apple martini

Each flavor sticker is designed with easy readability and eye-catching appeal in mind. These stickers are the one main departure from Nineshotz signature artistic style. The flavor stickers have their own look and feel, adding to the distinctiveness of the Nineshotz Cube graphic design. There are three main design elements and one background element that must be included on every sticker. At the bottom of each flavor sticker, there are three icons. To the far left, is the primary flavor icon, in the center is the base drink icon and to the far right is the secondary flavor icon. See Images 5.4.4a through 5.4.4c.

Nine great flavors will be introduced at the time of launch.

5.5 Promotional Items

We have prepared a line of promotional products such as t-shirts, hats, key chains and similar items to be distributed free of charge at events and other functions as a "thank you" to our customers. Every item is to be imprinted with at least the Nineshotz logo. If there is appropriate room on the promotional item in question, the web address will also be listed. An adequate inventory of premium promotional items will be warehoused so our customers can purchase these items from our website nineshotz.com. These items will include high-quality polo shirts, golf and baseball caps, pens, shotglasses, gifts, etc. We intend to drive as much traffic to the website as possible by using the aforementioned voting system for future drink recipes, referral programs, as well as a calendar of Nineshotz events and taste-testing locations only available online.

The Nineshotz Corporation, acting as a responsible member of the alcoholic beverage community will include as many "enjoy responsibly" items as possible in our promotional item inventory. An example of one of these items would be our signature Nineshotz corporate seal keychain, with "Enjoy Responsibly" etched into the reverse. These types of high-perceived value items will be especially effective in building brand awareness while simultaneously promoting and reinforcing responsible alcohol consumption.

## **BASE DRINK KEY**

Our flavor stickers 'drink keys' provide a hint to the style of beverage contained within, we can produce any type of formula including Margaritas, Martinis, Cocktails, etc.

B nineshotz

Apparel will be available in two different versions. Non-employee apparel will be of the type offered for retail sale or credit redemption via the Nineshotz Online Store. Employee apparel will only be offered to current employees. Fitted polos and button-ups will be available in both men's and women's styles. Nineshotz corporate apparel will be the dress code for company related functions.

Illustrated to the left is a men's fitted polo with apparel-only logo embroidered in white.

Exterior signage offers excellent opportunities to represent our brand in a unified and consistent manner. When preparing signage either in-house or with a vendor, ensure that our branding guidelines regarding typeface, color and size relationships are reviewed and understood before layouts are created. All signage must receive CBR approval before introduction.

The logo is of the utmost importance in the preparation of signage. Use of the logo in layouts for exterior signage must be handled with particular attention to readability and impact.

	5.6.1	Banners

Banners should be printed on heavy-duty vinyl material for maximum durability. Messages will be kept simple; the copy concept of banners mimics that of out-of-home media.

Other signage needs will be handled on a project-by-project basis.

5.7.1 Implementation

Implementation of our marketing strategies will occur in accordance with these guidelines. As with all businesses, a plan can only be a starting point for achieving marketing objectives. We will constantly finetune our marketing activities in response to market fluctuations but will always make it priority to keep our message clear. The combination of an excellent product, innovative marketing & advertising and a fresh perspective on the alcoholic beverage industry will aid in the success of Nineshotz.

Nineshotz will both sponsor and host special events. We will be very cognizant of the companies we choose to do business with, as our reputation is more highly scrutinized when associated with an event. Our corporate image must be maintained in accordance with these branding guidelines for all materials and signage associated with any event.

## 8.0 Manufacturers Suggested Retail Price

Our research suggests that the product should have a price point of between \$17.00 and \$19.00 to be competitive in the U.S. market. A retail sales price on the order of \$17.99 is suggested for product pricing at launch. The unit cost estimates are based on recent pricing obtained from vendors. Accordingly, the unit cost calculations in the Pro Forma estimates and Operating Budget are based on these figures.

9.0 Appendix

9.1 DISCUS 2018 Industry Review

# **Distilled Spirits Council** 2018 ECONOMIC BRIEFING

February 12, 2019 • New York City @DistilledSpirit #StateOfSpirits19

DISTILLED SPIRITS COUNCIL Nine Consecutive Years of Market Share Growth

- \$178 billion in economic activity
- 1.6 million jobs
- Nearly \$30 billion in federal, state and local taxes
- More than 2,800 craft distillers in the United States

# Chris R. Swonger **Distilled Spirits Council** President & CEO

# **Economic Impact of the Spirits Industry**

- This segment has increased by 107 percent since 2013 (TTB)

## 9.0 Appendix

9.1 DISCUS 2018 Industry Review

# **2018 Key Policy Victories**

Defeated tax threats in 19 states, saving industry \$540.4 million

- Sunday sales bans lifted in Indiana and Tennessee
  - Since 2002, 20 states have passed Sunday sales legislation bringing the \_ total to 42
- Passed "Brunch Bill" in Georgia allowing earlier on-premise Sunday sales; More than 54 localities approved earlier hours

- Long-term declines in underage and binge drinking continue
- Alcohol-impaired driving as a percent of overall traffic fatalities is at the lowest percentage since Department of Transportation began reporting alcohol data 1982
- Spirits sector contributes to progress through evidence-based underage drinking programs, support for strict enforcement of existing laws, and comprehensive anti-drunk driving legislation
- Drug-impaired driving on the rise:
  - In 2016, 44 percent of fatally-injured drivers with known results tested positive for drugs, up from 28 percent just 10 years prior. (2018 GHSA Report)
  - Spirits industry (R.org) has supported increased awareness on drug- and polysubstance-impaired driving and provided funding for advanced law enforcement training
  - Spirits industry (DISCUS) has lobbied in support of funding for the development of accurate and reliable roadside testing technology for marijuana

### Analysis of Global Marketing Strategies in **Distilled Spirits Industry: Absolut Vodka**

Dr. Etienne Musonera, College of Business, Eastern New Mexico University, USA Dr. David Hemley, College of Business, Eastern New Mexico University, USA

#### ABSTRACT

The vodka industry is in a revitalized phase despite the assertions by most analysts that it is in the mature phase of its product life cycle. The focus of this study is to evaluate global marketing strategies in distilled spirits industry, and our analysis will concentrate on four issues that seem to delineate the conventional vodka marketing landscape. They are Mature Industry, High Brand Loyalty, Too Many Competitors, and Limited Marketing Opportunities. Keywords: Vodka, Competitive Marketing Strategies, Spirit Industry

#### INTRODUCTION

Despite whom you might ask, the origins of Vodka (Slavic for "little water") come from either Poland or Russia. But the 500+ years of development have created one of the most competitive brand battles in the distilled spirits industry. Vodka accounts for nearly one-quarter of all distilled spirit sales, and continues to show annual growth despite the assertion by many marketers that the product itself is in the mature phase of its life cycle. Vodka can be classified three ways: premium, super premium and ultra premium. These designations relate to the vodka's quality, which is attributed to the number of times the vodka is distilled and what type of filtration process is employed. The vodka goes through this process several times to remove the impurities in the solution. The more times the process is employed the higher the status of premium placed upon the vodka. This in turn affects the consistency and taste of the vodka (which characteristically has no definitive taste). As a result, the quality and taste of vodka become important selling points to the marketers. Normally these constructs, which are used in defining the value of what is being exchanged, are untenable due to their unambiguous nature. Yet the positioning placement of relevant competitors in the industry will indicate the import of these constructs, with the usage of two baseline variables consistent across the entire industry. There are many issues facing the vodka companies today. The focus of this study will concentrate on four issues that seem to delineate the conventional vodka marketing landscape. They are Mature Industry, High Brand Loyalty, Too Many Competitors, and Limited Marketing Opportunities.

#### Mature Industry

Most marketers tend to agree that the vodka industry can be characterized as being in the mature phase. In defining the product and market portfolio, the Boston Consulting Group Matrix defines the mature industries (or "Cash Cow") in the following manner: mature products that make lots of money, difficult to grow, difficult to find new consumers (Voyle, 2002; http://www.brs-inc.com/models). In other words, the Vodka Industry can be considered a "Cash Cow" simply because it has a high market share in tandem with the rest of the distilled spirits industry (25% of the distilled spirits sold in the U.S.) but growth potential is low and presently all competitors are at the harvest stage, meaning they try to steal away potential customers from others while maintaining their own core clientele (Estes, 2000). Also, this industry classification reflects the tendency that most competitors will generate lots of money. According to a study released by AC Nielsen, the 2001 yearly sales for Vodka at Liquor Stores and Supermarkets were \$592 million in the US, up 6.1% from the previous year. Yet this was an indicative of an overall slowdown in the consumer purchase of Vodkas from 2000 figures, which were at \$552 million or up 11.6% from the previous year (Hein, 2001). The marketers express the need to increase their product portfolios through the introduction of products that will skew toward the lower end of the age demographic. To this end, many Vodka manufacturers have created flavored Vodkas and Malternatives (malt-based alcoholic beverages with some vodka content). The danger of producing these so-called "Alcopops" is that the marketing campaigns tend to attract underage drinkers.

#### High Brand Lovalty

Vodka experiences high brand loyalty owing to the fact that users in this segment rarely experiment with new products. The consumers may experiment with product line extensions of their favorite name brand, like the new flavored vodkas, but rarely venture out of the family line. In fact, because of the considerable amount of competitors in this industry, consumers tend to actively seek out a product that has name recognition or a status attached to it. The argument here is that to an extent the consumer forms a bond with a specific vodka brand and this bond is hard to separate-Self-Concept. Also, young women (18-24 age range) have been recently categorized as spirits drinkers that would seek out new brands and new venues, more so that men in the same age demographic. These women are considered "highly impulsive" with regards to drink experimentation as opposed to the "pack mentality" characteristically found in men (Mason, 2000).

#### **Too Many Competitors**

With several hundred different choices of flavored/non-flavored, domestic/imported, and super-/ultra-premium Vodkas out in the marketplace, the need to differentiate becomes vital to the survival of these brands. Some brands may differentiate in quality (Grey Goose, Ketel One), others use urban legends (Skyy doesn't cause hangovers) and Country of Origin Image (Stolichnaya-Russia) to raise their profile in very competitive Vodka market.

Product Base: Whereas most vodka products are made either from potatoes, wheat or rice, these products are effectively using the unique product bases in their marketing campaigns. Vermont Spirits White Vodka is made from a process that employs milk as a substitute to the water found in most Vodka brands. 3 Vodka has the distinction of producing Vodka from soy. Although most consumers will make the assumption there are health benefits to partaking in a glass of 3 Vodka. Finally, Blavod Vodka, a product from the UK, has the distinction of being made from an east African root called Catechu. The addition of this root provides another distinction for Blavod-the only black-colored Vodka drink

Alcoholic Content: Standard vodkas all have one element in common: they all are 80-100 proof, or have 40-50% alcoholic content by volume. This is starting to change with the introduction of the Light segment. Light Vodkas, like Dimitroff Light, have less alcoholic content by volume, usually hovering in the 24% range.

Packaging: Packaging remains the most curious nature of this industry. In some cases, vodka manufacturers attempt to create an image of quality in the packaging of their product. Finlandia uses Austrian Glass in order to denote an appearance of class in their vodka. Grey Goose, from the Cognac region in France, distributes their bottles with a long thick neck. Initially, merchandisers placed Grey Goose on the top shelves because their bottles could not fit sideby-side with their competitors. The marketers had distinctively created these bottles so that they could be seen at bars, towering over the rest of their competitors (Estes, 2000). The reasoning is that many marketers believed that consumers' preferences were established at nightclubs and bars, where a pack mentality (everyone ordering the same drink) occurs. Finally, Jazz Vodka has probably created the most distinctive bottle. Using a form of reinforcement, or the concept of "packaging as art" the makers of the Polish-based Vodka have created a bottle in the shape of a trumpet.

1 nineshotz

#### Limited Marketing Opportunities

The voluntary ban of hard liquor advertisements on television has made mass marketing difficult for vodka companies. As a result, vodka companies have sought innovative avenues of marketing in order to effectively promote their products. Absolut, one of the manufacturer's under analysis, has created the seventh most successful marketing campaign in the 20<sup>th</sup> Century, according to Advertising Age (Garfield, 2001). The print ads used taglines like "Absolut Perfection" and had respected artists (like Andy Warhol and Keith Haring) creatively interpret Absolut's medicine bottle. Michel Roux implemented this merger of marketing and artistic expression in 1978 with help from the advertising agency TBWA. Even the collection of print ads that have been exhibited in world famous museums reflects the notion of Absolut's subversive advertising campaign.

#### SIGNIFICANT MARKETING STRATEGIES OF THE INDUSTRY

Although Absolut has primarily cornered the print ad market with their innovative approach to "marketing as art" other competitors have sought out ways to create public awareness of their products. Four of these approaches will be discussed.

#### Brand Extensions

The appeal of flavored vodkas is definitely adding considerable recognition to the family's anchor brand name. As vodka companies start experimenting with new flavors (chocolate, pepper) consumers are willing to sample them. The consideration of these "repertoire drinkers," or those who enjoy many different types of alcohol but don't decide what to drink until the last minute, is the focus of many marketing strategies (Mason, 2000). By becoming a spiritsfriendly environment, bars and nightclubs in tandem with vodka companies can promote the appeal of these FABs (flavored alcoholic beverages).

#### Mass Marketing Mediums

Absolut Vodka has taken a unique approach in the Latin American markets. Owing to the ineffectual use of the print campaign, Absolut has constructed two movie promotional advertisements that are running in cinemas throughout Mexico and Venezuela. The advertisements for Hey Stranger and BeatCrazy come complete with movie posters and special websites devoted to the promotion of these pseudo films. The subtle-somewhat subliminal BeatCrazy movie poster contains the silhouette of the Absolut Bottle in lieu of a record stylus. The subliminal aspect of these ads is actually taken one step further in Smirnoff's recent television ads for their product Smirnoff Ice. This approach is somewhat controversial in nature because Smirnoff is implying that their product has vodka in it, which would remove these commercial spots from television. The truth is that the US-version of Smirnoff Ice (also known as a "Malternative" or "Alcopop") is actually a malt-based beverage (similar to Zima) that is characteristically known for its citrusy flavor. In markets outside of the US, this product does contain vodka. The effect of these commercials is interesting. According to BrandEra, a marketing consultant group, the marketing campaign has increased sales for the anchor product, owing to Smirnoff sales moving in sympathy with Smirnoff Ice. More importantly, BrandEra believes that although the marketing campaign is counter-intuitive (malt beverage sales driving vodka volumes) the end result reaffirms the importance of name recognition and constant brand reinforcement (BrandEra, 2001). Yet this confusion will continue with the recent introduction of Skyy Blue, a malternative with vodka content. There is no doubt Skyy feels that they can profit from the confusion of the young consumers in a similar manner that Smirnoff does.

#### Sponsorship of Lifestyle Events

Many vodka companies strategically create cross-promotional activities in order to establish a subconscious association with regards to a specific lifestyle. Absolut has always been associated with fashion due to its continuous sponsorship of key Fashion Shows in New York City. A recent cross-promotion with Revlon emphasizes this emphatically. In their Absolutely Fabolous Lip Cream campaign, Revlon hosted a series of upscale parties in order to promote a new line of lip colors. Using Absolut to create cocktails entitled "Absolut Temptress" and "Absolut Vixen"

reflected a marketing program that synergetically combined elements of product, indulgence and fashion (Bittar, 2001). Skyy Vodka has also been a key supporter of cinema as well. Skyy Cinema represents its overall marketing approach in creating an identity with independent filmmakers and film companies. Its sponsorship of the famous Sundance Film Festival and the recent cross-promotion for the motion picture Zoolander (which has actor Ben Stiller portraying a male fashion model in a pose that recreates a famous Skyy Vodka poster for the movie ad) illustrates Skyy's dalliance in cinema.The commonality of these lifestyle elements (fashion and cinema) becomes universal themes for several of these vodka companies. Because of the implicit ban of vodka ads on television, cinema becomes a global medium in which the message can be adapted for the local market and delivered. Building a secondary relationship upon fashion, vodka companies create an association in the minds of the consumer that vodka is indicative of a fashion accessory. Kenichi Ohmae (1989) reflects the importance of high-quality fashion-based items, where the price is high comparatively speaking and the purchase frequency is low. Vodka by definition is not a commodity product, but rather is representative of luxury items in which consumers pull the product. This notion of global standardization of a product serves these vodka manufacturers well around the world.

#### Websites

Many of the well-known vodka brands have constructed websites in order to provide product information to their target audience. Absolut's website includes the aforementioned pseudo motion picture promos as well as an imbedded web program that allows the viewer to create their own "mini-movies." Grey Goose has a website that allows the viewer to change the songs playing in the background. Whereas Absolut websites are considered slick and directed at the youth segment of this market, Grey Goose and Rain Vodka websites are targeted to the more sophisticated consumers. On several websites purchases can be made directly to the company. This represents a dangerous proposition for vodka companies. Although each website asks whether the individual is 21 years of age or over (since most websites are in English and targeted at US-based consumers) the website primarily relies upon the honor system in its usage. Both Diageo and Vin & Sprit, the parent companies for Absolut acknowledge the import of social governance. Their corporate responsibility focuses on the issue of product abuse and its ramifications as well as the issue of underage drinking. This becomes a greater concern owing to the fact that both Diageo and Vin & Sprit's product portfolios are replete with examples from all distilled spirits categories (cognac, rum, whiskey, etc.).

#### STUDY APPROACH FOR EVALUATION

In developing this analysis, one has to consider various approaches in doing a comparative analysis of two market leaders (Most Relevant Vodka Competitors: Domestic vs. Imported). The following illustrate the focus analyses in this comparative study: competitive, strategic and demo-/psychographic analysis.

#### **Competitive Analysis**

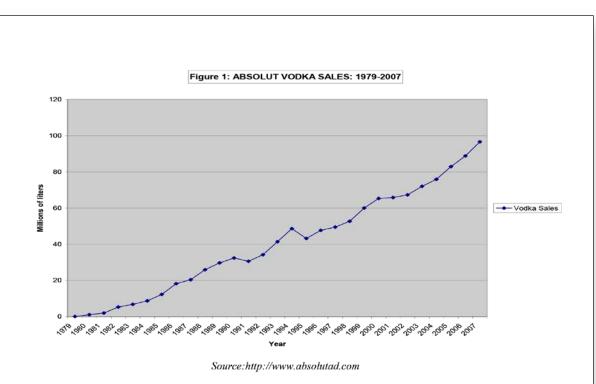

Due to the hyperkinetic nature of this industry, competitive pressures continuously drive all relevant competitors to create innovative campaigns. The pursuance of ever-evolving marketing programs allows the vodka companies to experiment with new approaches in hopes of raising brand awareness above the cacophony of competitor voices. Absolut Vodka has created unique campaigns to solidify the dominance in global sales. The resulting analysis will define each market leader (or in Philip Kotler parlance, "Market Leader" and "Market Challenger") with respect to the industry as a whole, and how their placement impacts their marketing programs.

Table 1: Absolut Vodka '	Top Ten Mark	ets 2007 (in million	s of liter

9.2 Analy	vsis of	Global	Marketing	Strategies	for Absolut Vodka

#### Strategic Analysis

The strategic analysis will focus on two problematic areas that Absolut has to deal with while battling with relevant competitors. Absolut's primary problem is two-fold: how to address the key Latin American segments where successful global marketing scheme is inefficient and more importantly, how to segue from complete reliance of this successful marketing scheme. Most marketing programs have a definitive life cycle, and it would be prudent for Absolut to be proactive in developing strategies that limit reliance on their "Absolut" " print ad scheme.

#### Demo-/Psychographic Analysis

Absolut focuses its efforts on the upscale consumer, one who values fashion and art among the finer things in life. The approach of targeting specific consumer demographics and psychographics is the evident in the aspect of crossnational segmentation, most notably the Europeanization of America. This conceptually underlies the emphasis of fashion and art in Absolut's marketing program (not coincidental since Absolut is Swedish-based). Although many may argue that the marketing campaign is all-American (owing to TBWA's handling of advertising duties) the impetus for this marketing direction primarily remains Absolut's domain.

#### STUDY APPROACH FOR RATIONALE

To an extent the following aspects play an important part in the global marketing strategy of Absolut: global branding, strategic alternatives in product market portfolios, and finally, cultural influences on product management. Each will be expounded upon in the following section:

#### **Global Branding**

When evaluating the performance of Absolut, one notices the immediate import of its brand name. With this acknowledgement comes the understanding that brands themselves are associated with a set of values (Chevron, 2000). In both instances, the brand denotes an immediate association with vodka, but also reflects the characteristics of adventure, danger, sophistication, and artistic appreciation. In the paper entitled Brand Leverage, the authors David C. Court, Mark G. Leiter, and Mark A. Loch researched the impact of branding on focused and differentiated product lines

(Court, 1999). In polling individuals for their research, the authors submitted a survey that had participants rate the characteristics of 130 brand names. The most cited characteristics in the survey include "youthful," "fun," "adventurous," and "exclusive." These are characteristics that are definitive of Absolut marketing campaigns. More importantly the research gleaned two successful strategies for focused brands. First, the researchers concluded that "Owning and Broadening the Category" is important in brand leveraging. The authors are convinced that making a brand's personality distinct is imperative and the company should constantly seek ways to broaden how consumers think about the category and the brand.

#### **Strategic Alternatives in Product Market Portfolios**

Vodka has increased its product lines to accommodate potential consumers. Smirnoff, in hopes of capturing the youth segment, has introduced Smirnoff Ice to considerable success, while Absolut's introduction of several flavored vodkas has also met with success. Absolut Mandarin is the number one flavored vodka in the US (Howard, 2000). Although Vodka product line extensions represent an attempt to capture a specific demographic (18-24 year olds), both Smirnoff and Absolut will need to pursue newly developed segments in order to insure survival in the industry.

#### **Cultural Influences on Product Management**

Both Smirnoff and Absolut, in developing a global penetration strategy, are forced to not only deal with competition from other vodka companies, they are also forced to deal with the prospect of substitute products. These products also are definitive of relevant competitors. The strategies employed have to deal with products that are not only cheaper locally but also to a greater extent ingrained in the local culture. These products include Soju in the South Korean market, Caipirinhas in the Brazilian market, Sake in the Japanese market and Tequila in the Mexican market. The marketer's dilemma is how to create an effective globalization strategy where these competitive products exist. Some may believe that the antithesis of Cultural Relativism is at work here, where stereotypical judgments are placated upon specific nationalities based upon drink preferential. However, a recent Financial Times article indicates in one instance that a local drink manufacturer, South Korea's Jinro Soju leads the spirits brand industry for the entire Global Market in 2001 with 55.7 million 9-liter cases sold. The second leading global spirits brand, Stolichnaya, sold only 54.5 million globally (Ward, 2002).

#### INDUSTRY TRENDS

#### **Demographic Environment**

Population Growth and Aging: The world's population is expected to grow to 7.47 billion by 2015, compared to 5.63 billion in 1994 and 2.52 billion in 1950. Some 80 percent of the world's population lives in the less-developed countries, where 95 percent of the increase in population takes place. Africa and Asia account for 90 percent of the increase. While Asia is expected to grow 40%, China and India will contribute to most of this increase. European population, however, is expected to decline over the next 30 years. The United States is the only major developed country projected for population increase. A common major trend is the aging of the world's population caused primarily by declining mortality rate. The population of over-65 age group will increase substantially in the next 30 years. Households age 45 to 54 are the single most affluent segment. Another important global trend is the rapid shift in the populations of the less-developed countries from rural to urban. What this population trend implies is the future spirits market attractiveness in the segments of young to middle-class urban people and Asian and African regions.

Growing Young Drinking Population: As the world population is growing, young consumers are considered the major segment for all the alcoholic companies. The young generation tends to be more independent in valuing the benefits of product consumption. Most young people have been exposed to either alcoholic beverages or hard liquor ads in their teens. The impact of the alcoholic products and advertising messages has indirectly promoted young drinking, and, in turn, caused a few social and legal issues.

9.2 Analysis of Global Marketing Strategies for Absolut Vodka

#### Socio-cultural and Psychographic Environment

The Evolution of Individual Values: The traditional society has been characterized by the values of hard work, thriftiness, and faith in others and institutions. However, a new social value has emerged. Instead of leaving the destiny of their countries in the hands of the elders and institutions, the young, particularly college students, collectively fought for what they perceived to be good causes. More recently, the younger generation (20 - 29 years of age), often referred to as Generation X, are concerned with simplifying their lives, with obtaining a college education, with their relations with their families and the opposite sex, and with the financial security. Some of their new values (especially in the Western societies) are: self-fulfillment ethic, better quality of life, blurring of sex roles, individualized definition of success, alternative families, self-reliance, growing sense of limits, and technology orientation. In this context, the alcohol product-delivering mood effects may include: "carefree and gaining", "increased enjoyment", "self-confidence", "sexual/relationship success", and "social success".

The Evolution of Family Structure: The traditional husband-dominated, closely structured family becomes less noticeable worldwide. Children are becoming more autonomous and participate at an earlier age in many family decisions. Many women are more independently economically. There are some new lifestyles and new family values implied by single individuals, adults of the same sex living together, unmarried couples living together, single parent families, and married couples with children from the past marriage. The vodka industry has recognized this trend and focused on the marketing strategy for the fragmented segments.

#### **Economic Environment**

Drinking Option Diversification: The world economy is expanding and the average personal wealth is increasing worldwide. With the booming economy and increasing consumption capability, there seems a clear trend that people prefer to drink better rather than to drink more. An individual consumer now tends to choose a price, a color, a bottle, and a flavor of liquor to match his or her mood. The trend of consumers' preferences may imply a need of consumer-oriented marketing strategy for the vodka industry.

International Trade Liberalization: Increasingly countries around the world have become more economically interdependent. Free-trade agreements have made the international trade in a more direct and easier fashion, such as European Union (EU), North American Free Trade Agreement (NAFTA), and World Trade Organization (WTO). Even China has to open its "virgin" alcohol market to the importers from all over the world.

#### Political/Legal Environment

Shaky TV Commercial Ban: Until now, the major TV networks, while happy to air million dollars' worth of beer ads each year, have refused to air ads for presumably more dangerous hard liquor. The Distilled Spirits Council of the United States claimed the credit for keeping gin, scotch, vodka, and other products off TV by its self-imposed ban on TV advertising during the past five decades. However, what really kept the distilled products off most of TV is that very few broadcast stations, mostly weak stations in small markets, would accept such commercials. Following distillers' intensive lobbying, both in Washington and with the networks, Diageo (the Smirnoff parent company) was able to buy airtime on NBC, promising four months of "drink responsibility" messages before moving on to product ads. Assuming that the other networks follow NBC's lead, a sweeping shift of media dollars into TV commercials can be predicted. As a result, government leaders, regulators, and some public interest groups have proposed possible regulatory actions, placing all alcohol beverages under scrutiny and even threatening the broadcasters with possible loss of beer and wine advertising.

Concern of Drunk Driving: Drinking is part of our culture and responsible consumption of alcoholic beverages is socially accepted. However, alcoholic abuse can have negative consequences for both the personal health and the society as a whole. The serious problem being discussed nowadays is automobile accidents caused by drunken driving. The advocate groups, like Mother against Drunk Driving (MADD), have been lobbying to legislate stricter laws to prevent this problem. In turn, they advocate to putting more restrictions on the liquor companies and their products. This social-responsible movement will change the marketing strategies made by vodka makers.

### **Technological Environment**

Trends in Electronics/Telecommunications: Electronics has played an important role in our society since 1950s. Probably nothing has changed our daily life more in recent years than the personal computer and the Internet. The developments of fiber-optic cables, storage devices, wireless transmission, and multimedia chips (microprocessors), are also changing the nature and scope of the telecommunication industry. These changes are revolutionizing how businesses operate, how goods and services as well as ideas are exchanged, and how individuals learn as well as interact with one another. Technological developments are having profound impact on all aspects of the marketing practice, including marketing communication (spirits ads on the Net or via e-mail), distribution (alcoholic products bought or sold on the Web), and marketing research (monitoring supermarket purchasing with scanners or Internet activity with digital "cookies"). It implies that vodka manufacturers need to catch up the e-commerce development.

#### Physical Environment

Concern of Environmental Pollution: Pollution problems exist throughout the world, especially in Eastern Europe, China, and the developing countries. A number of environment-conscious groups have advocated for manufacturing the "green" products and recyclable packages. The traditional glass bottles used in the spirits industry are under discussion for the replacement of alternative materials.

Social Responsibility: The world has put more social responsibility to the alcoholic firms. Several social and environmental organizations have advocated consumers to use the products caring for the environment and minimizing the impact on the environment. Vodka manufacturers, in this context, are required to deliver their marketing strategies and products reflecting this global environmental trend. Some companies have communicated in their ads about the negative effects of drinking abuse and young drinking.

#### COMMON STRATEGIC DRIVERS

#### **Challenges in Mature Markets**

Vodka industry is in the mature stage of the product life cycle where the market volume is fairly stabilized. The primary marketing objective of most competitors is simply to hold their existing customers - to sustain a meaningful competitive advantage that will ensure the customer satisfaction and brand loyalty - the means to maximize the product's lifetime value. Thus, the financial success in the vodka industry depends heavily on the firm's ability to achieve and sustain the lower cost manufacturing and better-perceived product quality.

#### Maintaining Competitive Advantage

Vodka defenders may initiate some product improvements or line extensions to protect and strengthen their position of existing markets, but they spend very little on new product R&D. They attempt to sustain a competitive advantage in establishing product markets through differentiation of their product offerings or maintaining a low-cost position.

### SOURCE OF COMPETITIVE ADVANTAGE

#### Product Differentiation

Most vodka manufacturers attempt to differentiate their product offerings by line extensions and superior product quality. Through the improvements of product quality and a wide variety of flavors, the competitors try to increase their brand's quality reputation – the perceived value that customers associate with a particular brand name or a logo.

#### Low-Cost Position

The most common strategy to maintain a competitive advantage sought by vodka makers is achieving and sustaining a low-cost position. A firm does not necessarily need a large market share to implement a low-cost strategy. Among others, some of the common cost-cutting methods are cheaper raw materials, innovative production processes, low-cost distribution, and reductions in overhead.

a nineshotz

#### **International Strategic Alliance**

Consolidation within the international alcohol industry has become a common trend. Medium-sized companies are seeking collaboration to be able to compete for sales with large chains with the leading companies. The major vodka companies often gain influence and control over distribution as well.

### TYPICAL COMPETITIVE BATTLE

#### Maintaining Current Market Share

The vodka companies always strive to maximize the flow of profits over the remaining life of the product-market. Thus, the most critical marketing objective is to maintain and protect the current market share. The defense strategy involves two sets of marketing actions: those aimed at improving customer satisfaction and brand lovalty, and those intended to encourage repeat purchasing. Also, as the spirits markets become more fragmented nowadays, share leaders tend to have to expand their product lines to protect their positions against competitive forces. Small-share competitors, on the other hand, often avoid prolonged direct confrontations with large-share leaders and focus on a niche market, such as Smirnoff Ice offering a different flavor in the segment.

#### **Extending Volume Growth**

The vodka makers might employ several different marketing strategies, either singly or in combination, to squeeze additional sales volume: 1) The increased penetration strategy intends to increase the proportion of vodka drinkers by converting current nondrinkers of their products. 2) The extended use strategy tends to increase the amount of vodka consumed by the average consumers by increasing the drinking frequency or developing varied ways to easily access to the products.3) The market expansion strategy will expand the number of potential customers by targeting underdeveloped geographic segments.

#### GLOBALIZATION POTENTIAL

#### **Clear Expansion Path**

For firms like vodka companies, with leading positions in mature domestic markets, less-developed markets in foreign countries often present the most viable opportunities for geographic expansion. A variety of ways, from relying on import agents to developing joint ventures to establishing wholly owned subsidiaries, are prevailingly applied by vodka makers. There is a common expansion path followed by most successful vodka companies - moving from home countries to developed countries to less-developed nations. This routing enables them to reduce manufacturing costs and gain marketing experience. In penetrating the U.S. market, the foreign vodka firms obtain further economies of scale and gained recognition for their products, which in turn will make penetration in other regions easier.

#### **Prospective Global Markets**

As disposable incomes and discretionary expenditures are growing in the countries of Latin America, Asia, and Africa, their markets appear promising future growth opportunities. With the success in the developed markets, such as the U.S and Western Europe, vodka firms are fairly easier to establish their "world brands" in the developing and lessdeveloped countries. With a globalization strategy in product standardization, vodka producers need to conduct broad market research of local preferences and establish appropriate product/country portfolios.

#### CONCLUSION

The vodka industry is in a revitalized phase despite the assertions by most analysts that it is in the mature phase of its product life cycle. The fact that Alcopops and FABs are bringing younger consumers into an industry that has long been defined as one serving an older sophisticated clientele base indicates how dynamic this industry has become within the last several years. Vodka still remains the number one selling distilled spirit accounting for one-quarter of the sales

in the industry and despite the pressures from substitute products, including beer and local (cultural) drink specialties, and competitive pressures from within the industry, vodka manufacturers continue to serve the needs of its consumers. In order to maintain its exiting dominance, vodka companies must persevere in further fragmenting the market in order to meet the needs of all of its consumers. There are visible gaps where these focuses are not being addressed, as mentioned in the previous section. More importantly, defining new niche segments, like Health and Energy-based vodkas, creates segments where these weaknesses in coverage can be minimized. Finally, the impact of cocooning ("a phenomenon where consumers who normally would have gone out for a night on the town decide to stay at home, where it's safer and cheaper-to drink") is evident in the industry (Hein, 2001). The future for the industry represents golden opportunities for those firms that can effectively maintain market share in this vastly competitive environment. The basic philosophy for the brand has been consistent throughout decades. Absolut still maintains the same business concept it held in the past: To offer the consumers a Swedish produced vodka of highest quality with high level of communication at a premium price. Today, Absolut vodka is still distilled and bottled in Ahus, a small southern town of Sweden. Future competitive prospects and expectations encourage the firms through extrapolation to focus on developing segments and markets in order to establish new niche products.
